HEAVY GLASS

PRODUCT INFORMATION

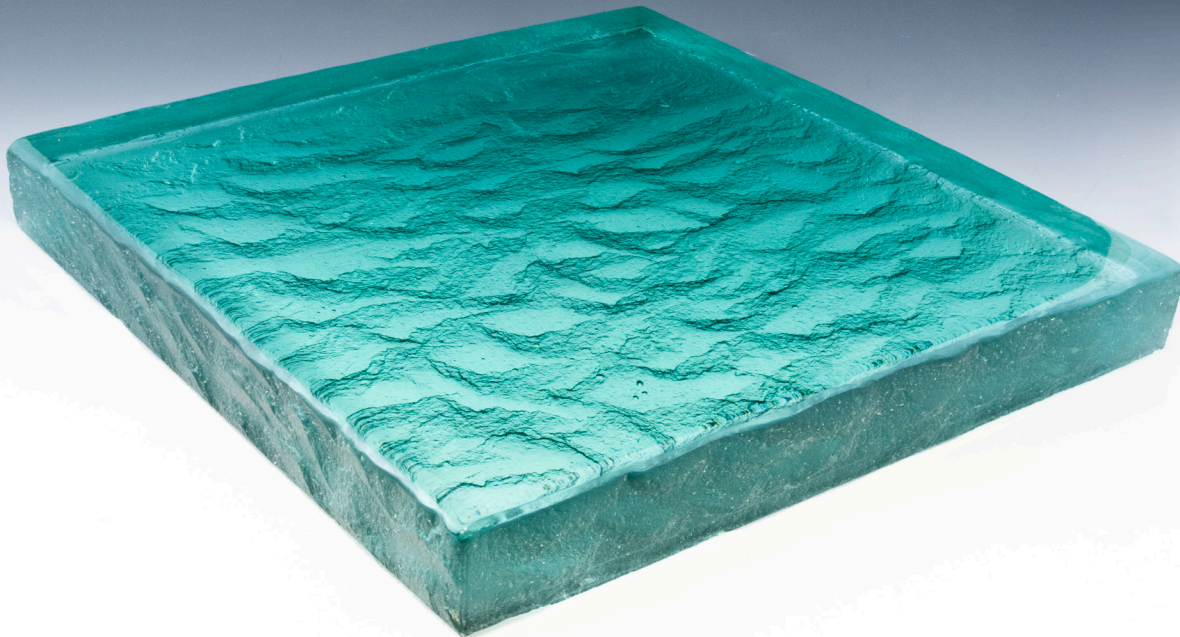

HEAVY GLASS, INSPIRED BY THE CHUNKS OF ICE

Just as the name implies, Heavy Glass is a substantial product ranging from 1.5 - 4" in thickness. Kiln-formed textured glass tops are one of Nathan Allan's most popular architectural glass products, used for countertops, bar tops, and tabletops. Thick glass tops are quickly replacing traditional countertop materials, as the surfaces of our kiln formed Heavy Glass is smooth, non-porous, and easy to clean.

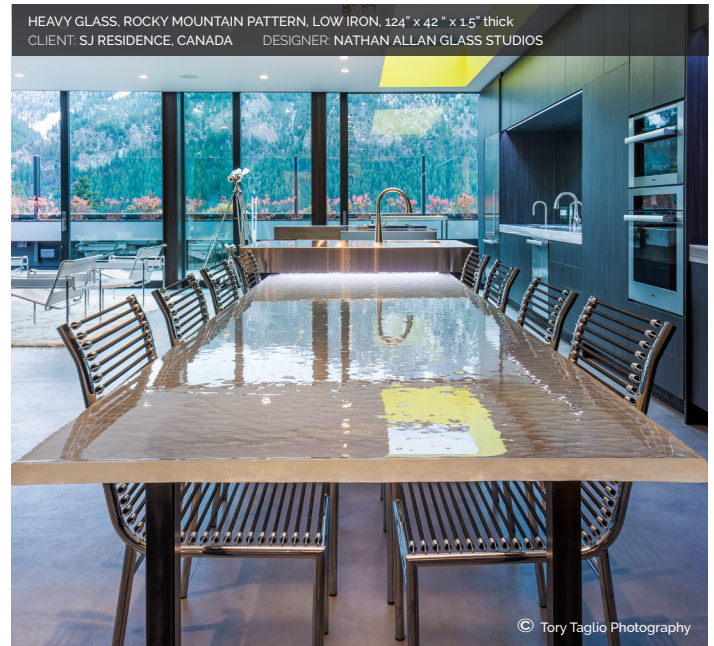

Choose an organic texture or geometric pattern for your thick glass top, from our 65 kiln-formed textures in our Classic Series. Shown in photo below, is our popular Rocky Mountain texture, with its deep, 3D textured surface. An exclusive Nathan Allan, Heavy Glass feature is our deeply textured edges, which is both unique in appearance, and functional in application,

as fingerprints can never be applied to the texture. Nathan Allan's thick glass countertops, bar tops, and tabletops can be produced up to 4" thick in clear glass or low iron glass. Further decorative glass top additions include vibrant color finishes or soft firefrost opacity coatings.

Application :	Countertops, Bar Tops, Tabletops
Collection :	Josiah J Collection
Series :	Heavy
