

## How to install Metal wire mesh curtain(Metal Coil Drapery)?

How to install Metal wire mesh curtain?

we products a lot of [metal wire mesh curtain](#) (metal coil drapery)during past years,It is an easy things for our workers,actually it is! but we often be requested to sent the installation method for [metal wire mesh curtain\(metal coil drapery\)](#)so here is this post to let you know how to install it after you ordered a metal wire mesh curtain or going to order a metal wire mesh curtain and afraid installation is complex,do not worry about it at all!

An image below can tell you what you will received and how the metal wire mesh curtain(metal coil drapery) should be after it is installed.

No matter the straight track or curved track, the installation method is the same (the above is the straight curtain track, below is the curved curtain track).

First step: you install the **curtain track** on the ceiling (or wall) with the fix accessories, these fix accessories are inside of packing, you can find there are a lot of small pcs (**fix accessories**) that can hook on the track and also there is a hole that can put the nail through. Then put a nail through the holes and fix that track on the ceiling (or wall).

Second step: Open the track cap, put through the stopper inside, then open the rings on that stopper and hook the wire mesh on the rings.

Last step: close the end of track with cap. A beautiful metal wire mesh curtain is present in front of you immediately!

Done! It is easy, right? If you have any questions, you can contact us anytime, we are the top professional [metal wire mesh curtain](#) (metal coil drapery) manufacture in China.
