This all-year cabin is well suited for a family of five and designed to accommodate a change in family composition and a mix of generations in years to come. The cabin is gently placed on the slight slope of the site, where the volume creates small microclimate zones with beneficial sun conditions for outdoor activities and easy access from the interior.

Helårshytten er tilrettelagt for en familie på seks, men imøtekommer dens endring i sammensetning, alder og generasjoner i årene som kommer. Hytten er skånsomt plassert i det svakt hellende terrenget, hvor volumets utforming skaper mindre klimasoner for ulike uteaktiviteter med lett tilgjengelighet fra alle sider av bygget.
