

SLIDEART COLLECTION

Chair FUNC fine varnished, Wall Cabinet base set 180 white

THE SLIDEART COLLECTION

Vision & Design

To use honest flat material and create beautiful furniture using as little as possible elements; that was our challenge. It started with the Chair ORI and we don't see the end of our collection yet. Every time we succeed in creating new items that assemble without nail, screw or glue.

Material & Colour

All the SLIDEART furniture is made out of birch plywood and is available in several colors and finishes. Tabletops and desktops are finished with an easy to clean HPL coating. Every part of our furniture is manually milled and sanded to get a perfect result.

Production & Environment

In our own factory in The Netherlands we produce our furniture with the utmost respect for the environment. Super low on CO2 in transport, hardly any waste and as much as possible sustainable wood. Which after its life cycle can be used in biomass to generate energy.

Sales & Service

We like to work together with people in partnerships. For us that means that we listen to our customers and will maximize our efforts to meet their wishes. We hope for the same in return. Not only our products are durable, so are our relations with our suppliers and customers.
