Blue & Green designs and constructs high quality swimming pools and spas in Italy and around the world.

“

*Take care of your body.
It's the only place you have to live.
(Jim Rohn)*

”

Thanks to our company's more than 30 years' experience we are able to respond professionally to the needs of designers, hosting structures and private clients who seek for a tailor-made pool or spa.

As **Blue&Green** we design and install various types of swimming pools, from the most innovative **tailor-made solutions** made of **glass and steel**, to the most accessorized **inground pools**, to **semi-inground** and **above-ground ones**.

Through our **Blue Sense** division we design **domestic and professional wellness areas** for private clients and hospiting structures.

We offer **qualified and extensive after-sales service** as well.

Thanks to our network of service centers and dealers we are able to operate **nationwide**.

FROM DREAM TO REALITY

We design unique and tailor-made concepts to give a shape to our clients' ideas, and then we offer them technical support to make their projects a reality.

Our Technical Department, equipped with senior architects and designers, elaborates the executive drawings.

We make technical inspections and work-planning with the installation team.

FROM DREAM TO REALITY

The Technical Department directs the laying process of accessories and components.

Eventually we test the installed products and deliver to the clients any users' manuals as well as technical explanations for the best usage and maintenance of the products.

After-sales and professional scheduled maintenance services are always available.
