## about us

Our lab is located in the heart of a small isolated village.

Surrounded by lushes green pine tree forests, one of which is located on Koukos mountain and has been the source of our inspiration, Megalochori is known for its dense flora and fauna, as well as its excellent microclimate that form a unique ecosystem.

Our novel idea for a new material deriving from the final waste of the olive – a product massively found in the Mediterranean Sea that encircles our island – represents our vision of an evolving world that values the environment in which we live. It is not only crucial to reduce environmental impact but to develop a whole new concept that reconsiders eco-waste and reinvents ways of using it also in modern design.

FEATURES OF THE MATERIAL

DURABLE

EXTRA HARD

WATER RESISTANT

THICKNESS 8- 200mm

CUTTABLE

GLUEABLE

INDOORS OUTDOORS

CASTABLE

## Koukoutsí eco-material

Founders Christos Ververis designer and Irene Moutsoyiannis marketer are tackling the issue of using eco waste to make something valuable out of it. The answer is to turn the olive core into a durable material that can be used in furniture and objects. This raw olive end material is already being used for heating purposes, but it could gain more value and turn into a new eco-multi-purpose material.

Koukoutsí eco-material gives value to what could be called "bio-waste" of the oil production process, extending the life cycle of the olive's pip and incorporating the "moto" of sustainability which is nothing more than "zero waste".

Uses- furniture, tiles, walling solutions, home interior products

## LESVOS BENCH

Koukoutsis eco-material, oak wood

Lesvos Bench is a revival of a traditional bench encountered in remote picturesque churches and old traditional coffee shops.

D: 150x30x40CM

## COFFEE TABLE

Koukoutsis eco-material, ply wood

Our new product is a round table top made from our "koukoutsis" material. The final result is silky smooth, mat or shiny gloss with visible blonde pip. Inspired by our natural island habitat. Perfect for all spaces.

Diameter 70CM H: 60cm

## LESVOS STOOL

Koukoutsis eco-material, oak wood

Introducing our new stool made from wood and koukoutsis eco-material. Durable, innovative, and easily assembled, our new stool can be incorporated in any modern styled space, preserving traditional designs.

Dim: 26x42x40cm

## ROUND SIDE TABLE

Koukoutsis eco-material, oak wood

Our new product is a round table top made from our "koukoutsis" material. The final result is silky smooth, mat or shiny gloss with visible blonde pip. Inspired by our natural island habitat. Perfect for all spaces.

Diameter 70CM H:45cm

## KOUKOUTSI BOARD

### Koukoutsy eco-material

Koukoutsy board is a board/ panel that can be used with several different ways such as wall cover, flooring solution, cupboard making etc. Our panels are customizable and come in several colors ( dark pip, blonde core, mixture of dark/blond pip etc.

## TINOS DESK

### Oak wood

Tinos desk is a custom-designed piece of furniture inspired by Lesvos bench. Made of solid blonde oak wood and designed by Koukos de lab.

Dim: 200x49x73cm

## MATERIAL SAMPLES

### Koukoutsí eco-material

A set of tiles as samples of our new material, Olive's Blonde Pip and Olive's Dark Core. Koukoutsí can be the perfect component to overlay your interior space with.

## about us

Irene, the managing director and co-founder of Koukos de Lab, works to ensure that projects are developed and delivered to their full potential. With a background in economics, marketing, and Young Entrepreneurship. At Koukos de Lab, she leverages her experience and her high aesthetics to create tailor-made client experiences and project management processes.

Christos is one of the founding partners at Koukos de Lab with experience as an Interior architect, Product, and Furniture Designer. Trained at both The University of West Attica and Birmingham City University, Christos mixes design and sustainable thinking with the conceptual thoughts and visions that bring creative projects to life.

Our mantra revolves around the idea that everything we design should respect nature and we could not have found a better place to accomplish this than this small village.
