

This apartment is specially designed by DA CHI International, with the spirit of creating spacious and comfortable interior style. The boundary between living room and kitchen is divided by a movable side doors, which allows the penetration of light instead of smoke. The modern light color interior design, mixed with wooden decoration, presents a simple, modest and luxurious spirit. The space for each room is calculated so that no extra area is redundant. Dining room is located at the center, which brings zero distance between family members.

This apartment is specially designed by George Kao in Da Chi International interior. The furnishing is combined by multiple materials, which reflect luxurious and unforgettable experience.

The entrance, living room and dining room are connected with large opening area. The window extends to floor that brings in more light to whole area.

The round table leaves more space for family to experience extraordinary dining atmosphere

Kitchen is included with a bar table that brings more variable usage for parents and more room for children activities.

Kitchen is dominated with white color. The transparent glass over the cabinet relieves family from stress and brings cozy and tidy image.

The other side of bar table can be used for kitchen purposes that brings more creativity for food.

Kitchen is located at the central area of the apartment. It connects with living room that increases the space for daily activities and family relationship.
