

Sports facility in Roselle

GIULIO BASILI ARCHITETTO
www.giuliobasili.it

The new US Grosseto 1912 – an Italian association football club – sports facility is located in Roselle on the slopes of the hills that host the ruins of the ancient Etruscan-Roman settlement. The buildings are arranged parallel to the direction of the cultivated fields which, since the reclamation, have designed the Maremma plain like a mosaic. The complex is organized in a longitudinal arrangement, like a stereometric volume sculpted in a different blocks characterized by deep excavations created as points of openings and main entrances.

The continuous surfaces are painted with a light plaster in contrast with the dark and earthy tones that color the excavated parts. A reference to the movement of light and darkness of the walls of the surrounding quarries.

The program included the construction of the offices of the sports club, a small boarding house with rooms to host the athletes of the youth sector, as well as a medical center, a refreshment point and changing rooms serving the two playgrounds.

Info and biography

'Giulio Basili architect' is an architectural firm based in Grosseto since 2010. It deals, in particular, with tackling problems, environmental limits in high-value landscape areas by proposing solutions in the context of contemporary architecture; urban redevelopment and renovation of public spaces and buildings in historic centers. Basili has participated in numerous architectural competitions as a chief architect and designer, obtaining reports and winning prizes and awards. His works have been published in various magazines and catalogs.

Giulio Basili (06/09/1979)

Architect, studied at The University of Architecture in Florence. In 2014 he received his PhD in Architectural and Urban Design at the University of Florence. Since 2002 he has participated in international architecture seminars and has won numerous competitions. Since 2014 he is a Contract Professor at the University of Florence, Department of Architecture. Since 2014 up to 2017 he has been a member of the Technical Scientific Committee of the University Center of Grosseto. He has published several articles and monographs on architecture magazines and catalogs.
