

our home studio / MNDA Studio.

The project of this house located in Lodi, Italy.

Involved an interior design intervention in every room except the kitchen.

The apartment of about 150 square meters between the ground floor and the first floor, was originally intended for a commercial activity as a clothing store.

In the renovation work it was decided to close the stairwell inside the spaces that was originally located outside the current house.

The photos show the particular entrance which maintains an External / Internal aspect with stone and wrought iron finishes.

The request was not to overturn the classic / liberty style that now characterizes the details of this house but to try to create lively and eclectic spaces through the use of retro furniture products. Subsequently the house became our home studio,

**MNDA Studio** which has in its philosophy the relationship between light and shadow, between matter and surrounding nature, all represented by particular and refined photographic images that recall a precise representation technique such as theatrical one, which often reinforces contrasts and enhances colors.

*photography by Arnaldo Abba Legnazzi*

Light, Matter and Retrò style.

The work and living space merge defining themselves on the identity of those who live there.

The project stems from the need to create a living and working space that would represent the design identity of the studio. Inspirations, lines and furnishing elements of a timeless design blend with modern and natural elements, welcoming and diffusing the light in the environment.

The color and materials, with warm tones and modern lines, they meet contrasting retro elements creating a welcoming and at the same time dynamic and youthful space.
