This operation relates to the rehabilitation and extension of the brigade of customs port located in the Grand port Maritime of Marseille. The urban mutation of the city, with the development of the Euromediterranne area, causes an expansion of the Port. The customs port therefore wish to create new premises, in order to relocate all of the Bangladeshi people in one and the same leu.

The project is divided into two parts: the interior renovation of the existing buiding in order to maintain consistency in the organization and operation of these tow entities.

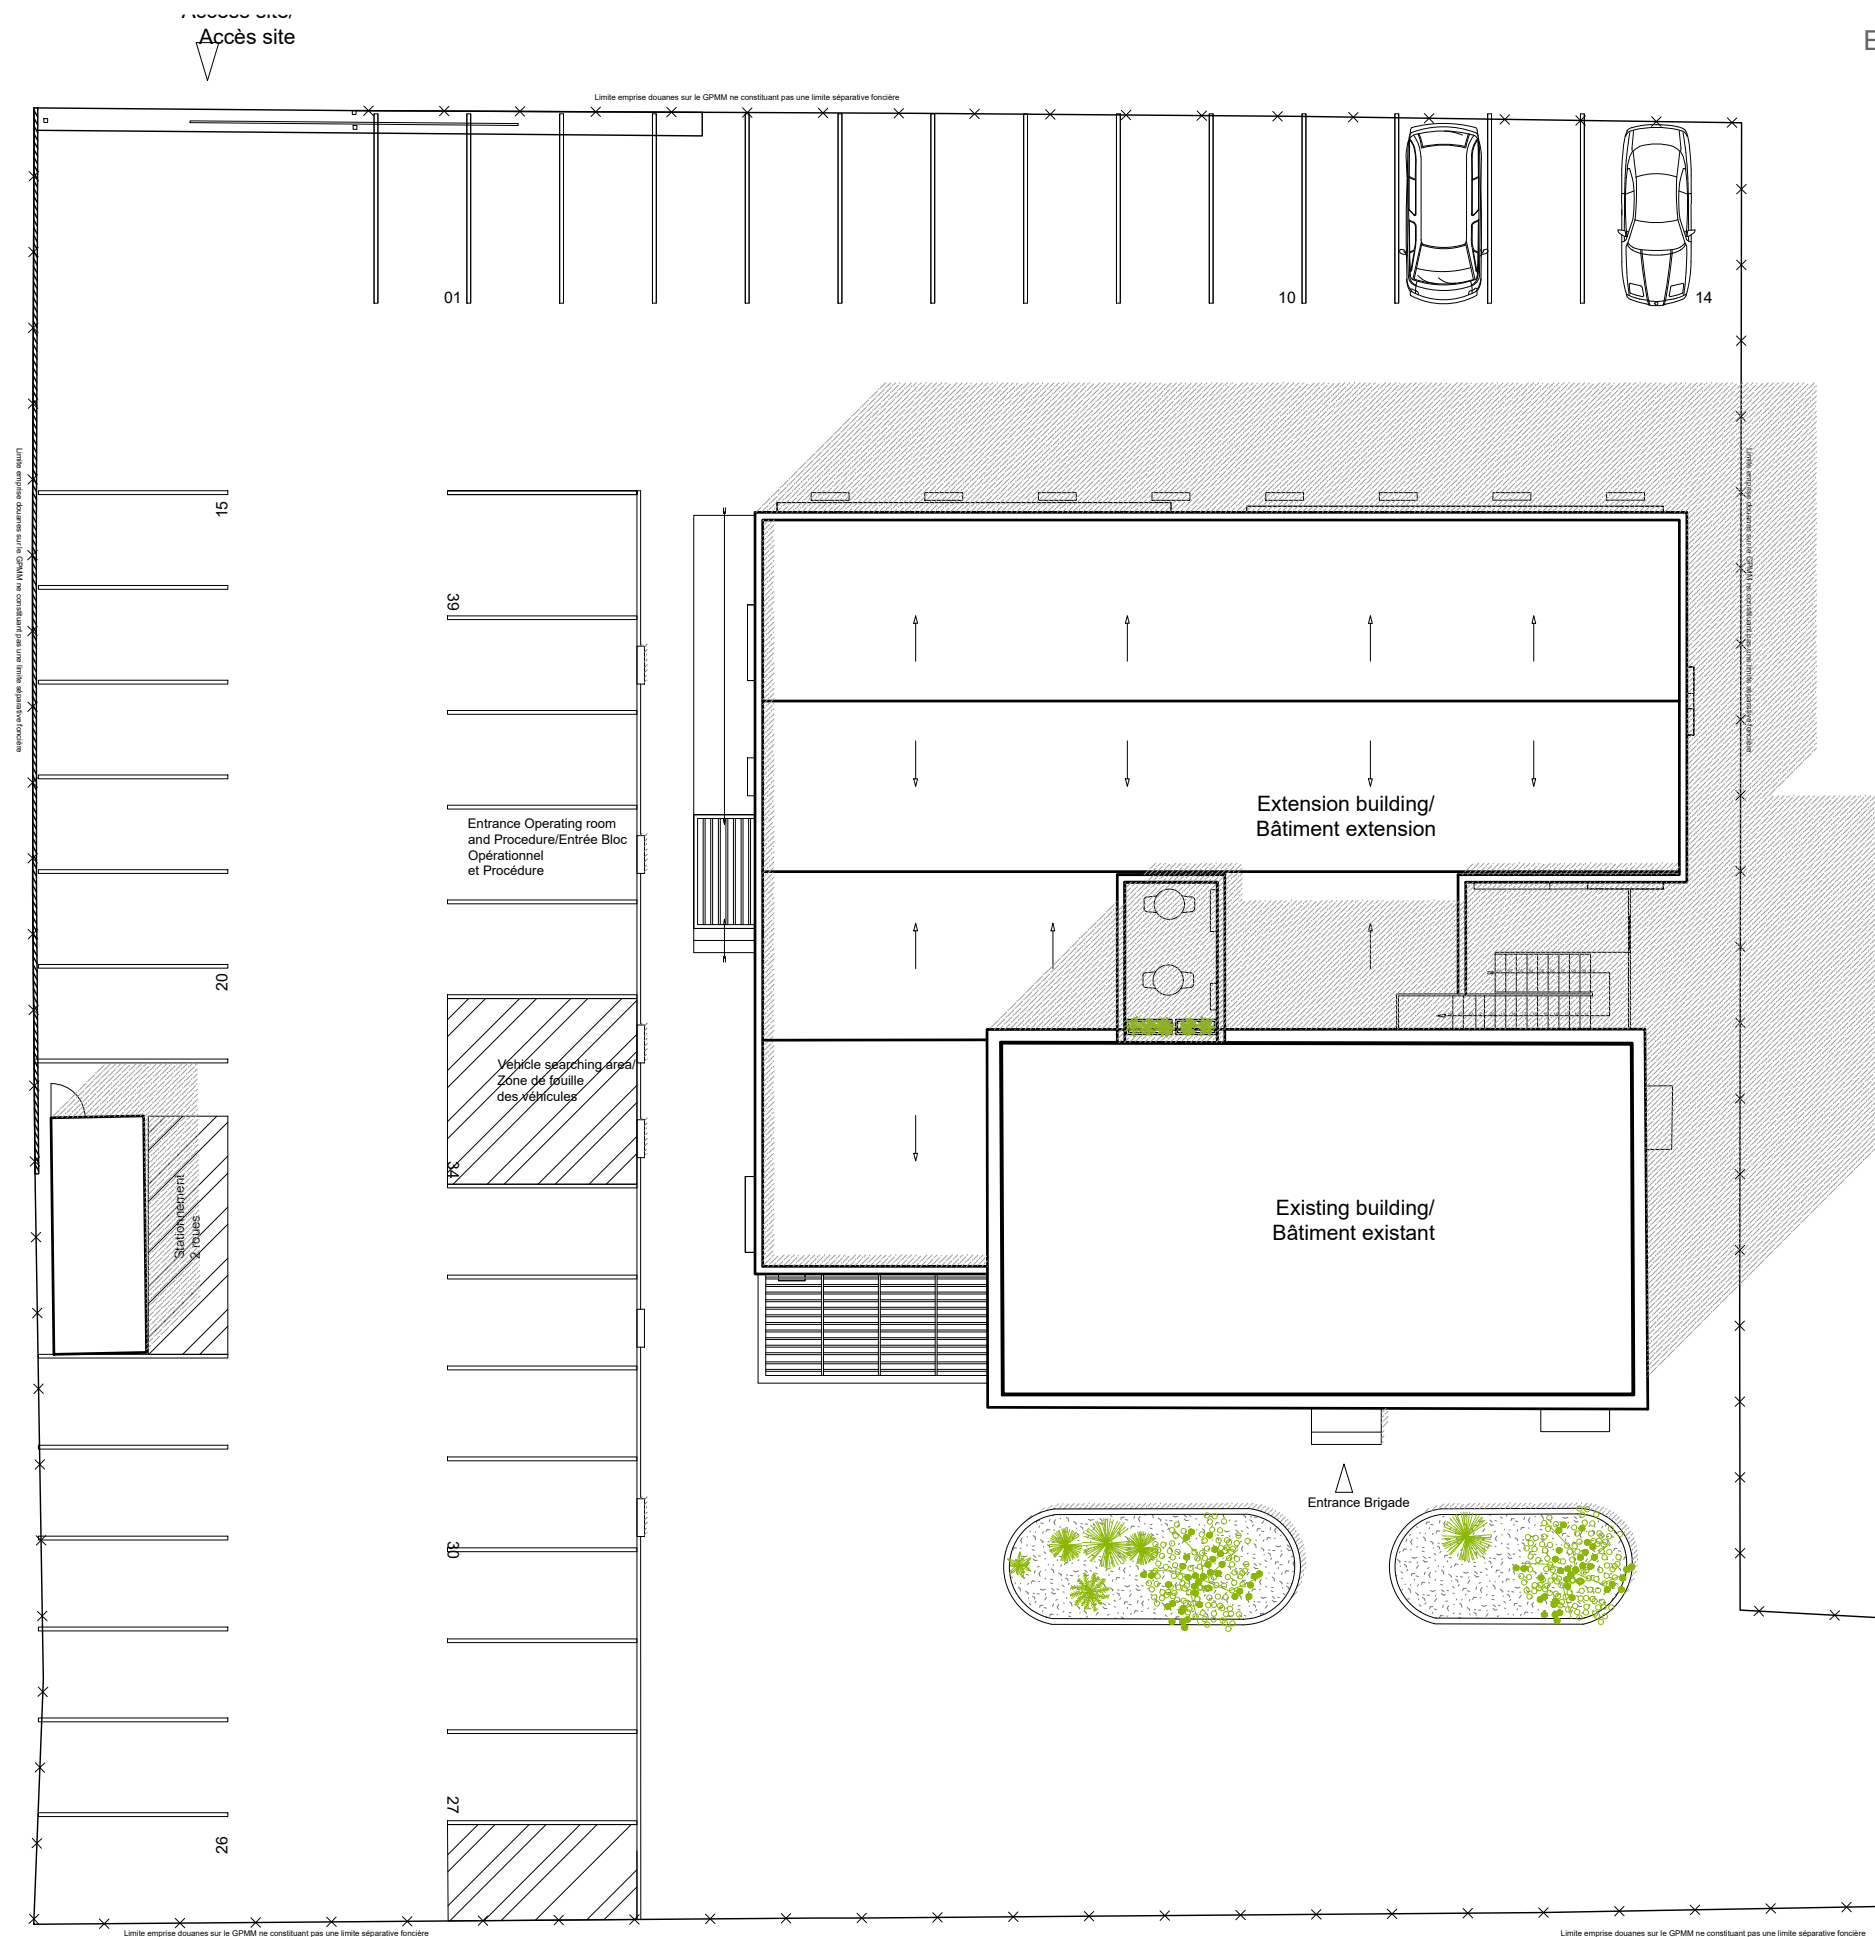

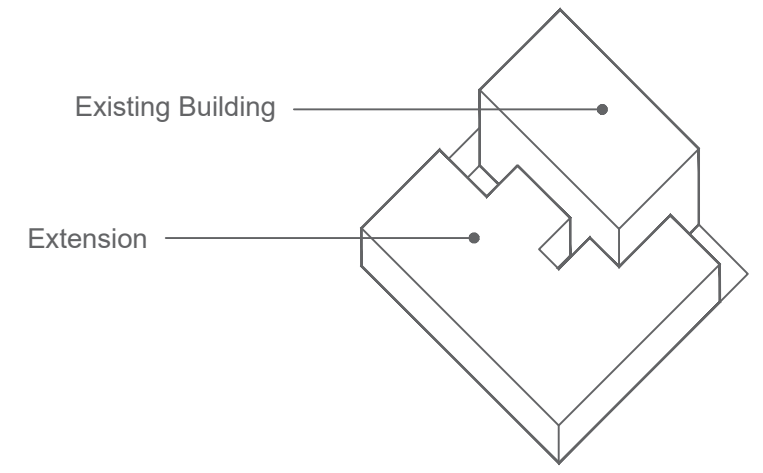

The implantation of the extension buiding is directly linked to the configuration of the land: It comes to wrap around the existing building. This project is based on a simple structural design, in light framework, responding to the regulations of the Grand port Maritime of Marseille requires to build buildings that can be dismantled. This building is on a single ground floor with a facade system similar to an assembly game: consists of large vertical openings and horizontal floor breakers, allowing staff to work freely while the buiding is secured. In addition, located by the sea and exposed to the climatic elements of a marine environment, the project takes advantage of the thickness of the facade and a choice of materials residing in corrosion, risolation and airtightness. The design results from these constraints in order to define a facade aesthetic ensuring technical and climatic performance.

## GROUND FLOOR LAYOUT

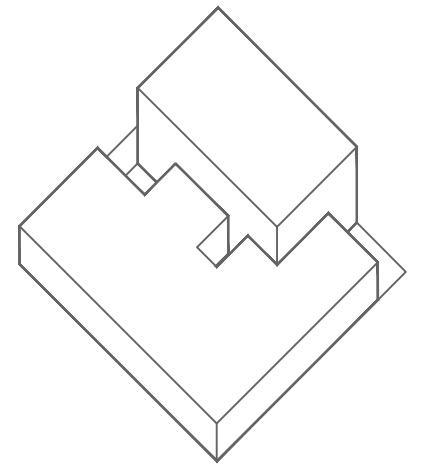

SCALE 1/100

- 01 \_ Reception hall/ Hall accueil
- 02 \_ Procedure block/ Bloc procédure  
(Cellule de retenue, Audition avocat,  
Médecin)
- 03 \_ Operating block/ Bloc opérationnel  
(Bureaux, Cellules opérationnelles)
- 04 \_ Men's dressing room/  
Vestiaires hommes
- 05 \_ Women's dressing room/  
Vestiaires femmes
- 06 \_ Weapons room/ Salle d'armes
- 07 \_ Patio
- 08 \_ Local saisies
- 09 \_ Salle d'ordre
- 10 \_ Local Social

# FIRST FLOOR LAYOUT

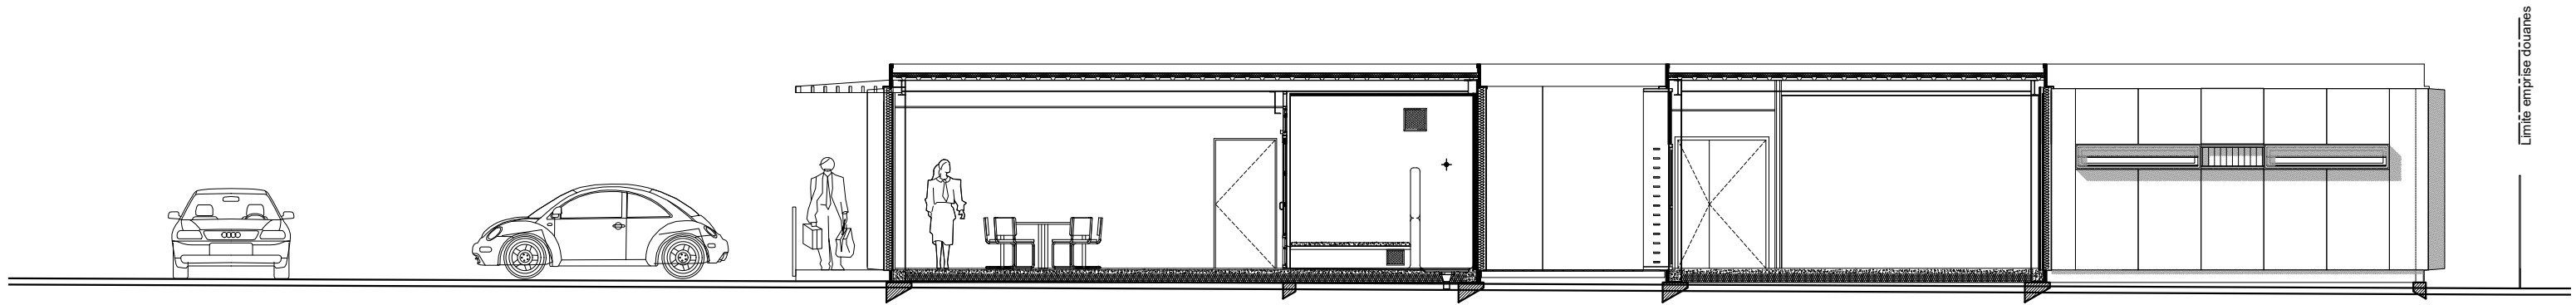

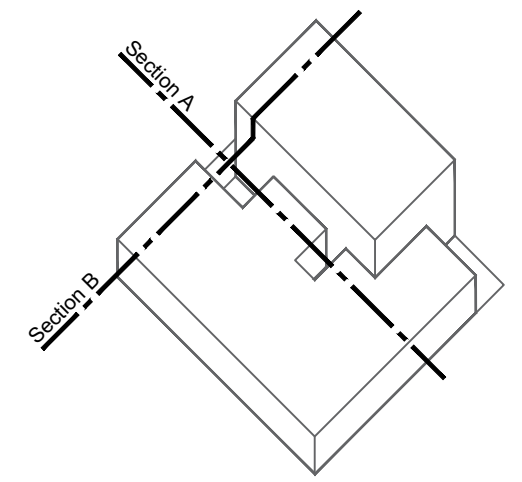

SCALE 1/100

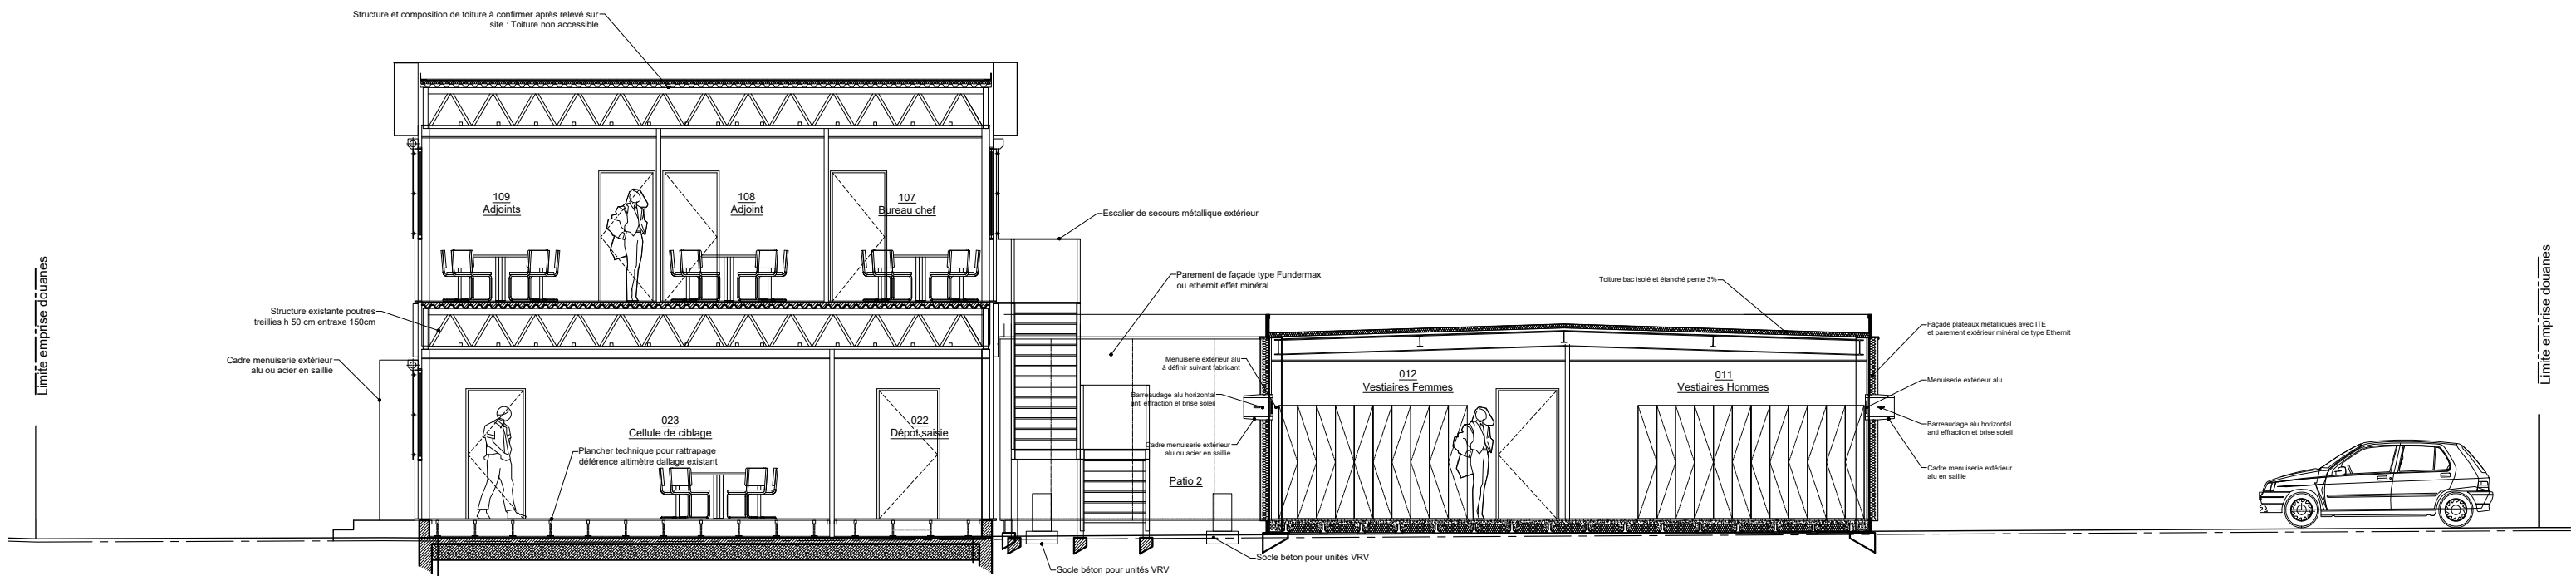

- 11** \_ Collective space / Espace collectif  
- réunion
- 12** \_ Secretariat / Secretariat
- 13** \_ Secondary holding cell / Cellule de  
retenue secondaire
- 14** \_ Reserve / Réserve
- 15** \_ Brigade chief's office / Bureau  
Chef de brigade
- 16** \_ Deputy's office / Bureau Adjoints
- 17** \_ Deputy's office / Bureau Adjoints

SECTIONS

SCALE 1/100

SECTION A

SECTION B

Structure et composition de toiture à confirmer après relevé sur site - Toiture non accessible

Structure existante poutres treillies h 50 cm entraxe 150cm

Cadre menuiserie extérieur alu ou acier en saillie

023 Cellule de ciblage  
Plancher technique pour rattrapage déferance altimètre dallage existant

022 Dépôt saisie

Escalier de secours métallique extérieur

Parement de façade type Fundermax ou ethermit effet minéral

Menuiserie extérieur alu à définir suivant fabricant

Barreaudage alu horizontal anti-effraction et brise soleil

Cadre menuiserie extérieur alu ou acier en saillie

Patio 2

Socle béton pour unités VRV

Toiture bac isolé et étanché pente 3%

Façade plateaux métalliques avec ITE et parement extérieur minéral de type Ethermit

Menuiserie extérieur alu

Barreaudage alu horizontal anti-effraction et brise soleil

Cadre menuiserie extérieur alu en saillie

012 Vestiaires Femmes

011 Vestiaires Hommes
