

Casa IV

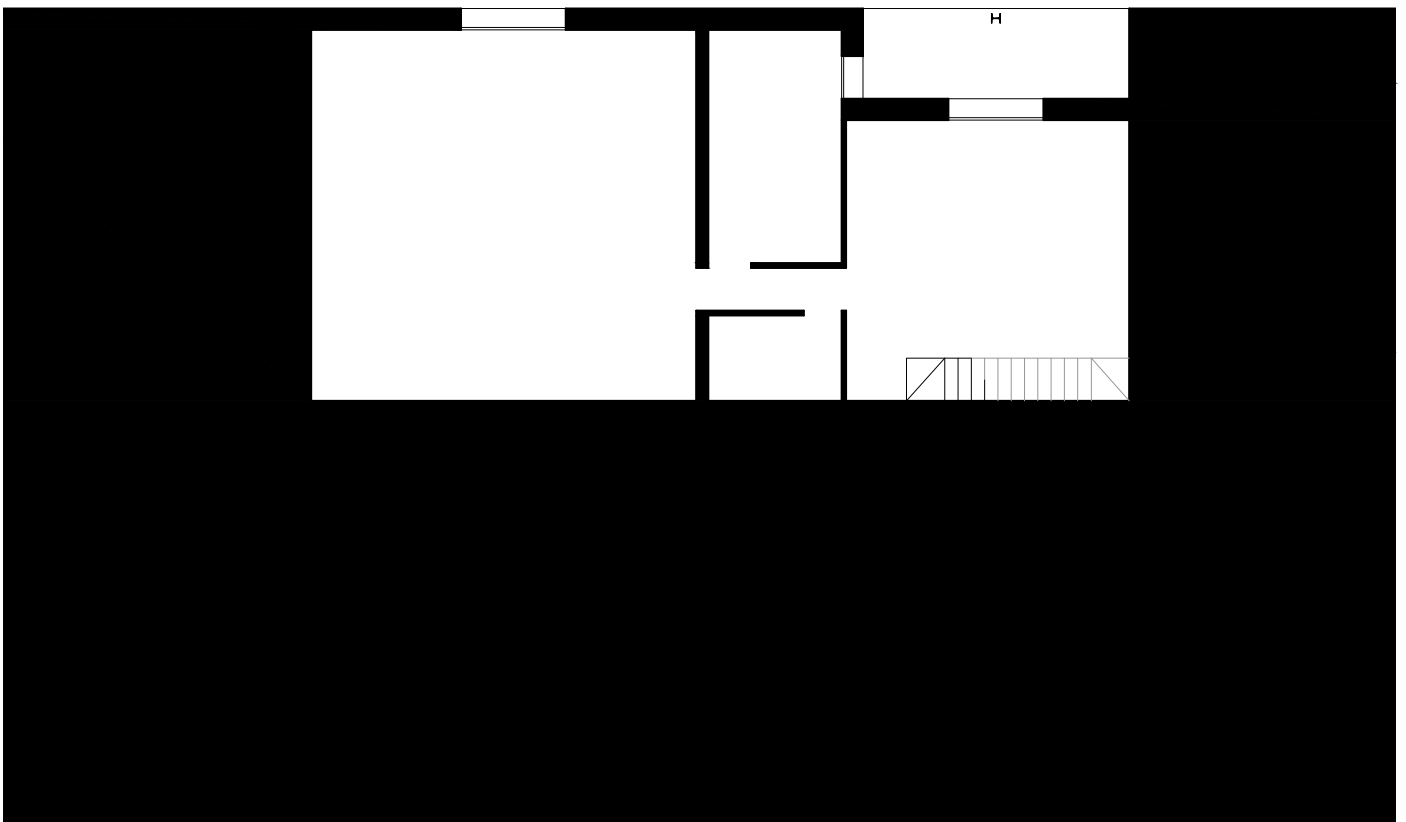

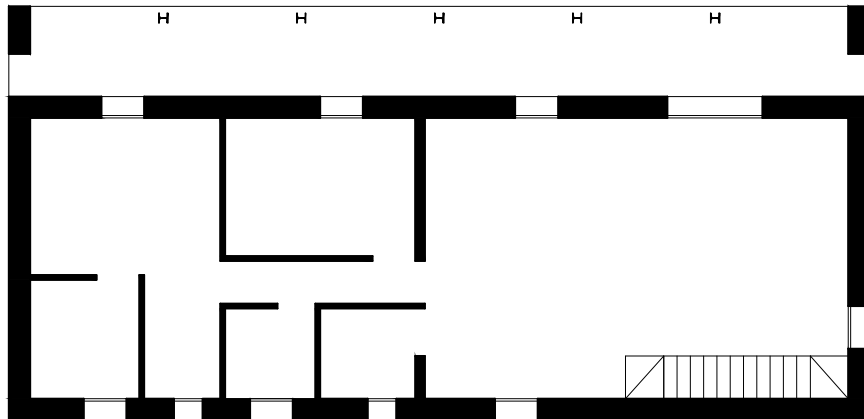

GIULIO BASILI ARCHITETTO
www.giuliobasili.it

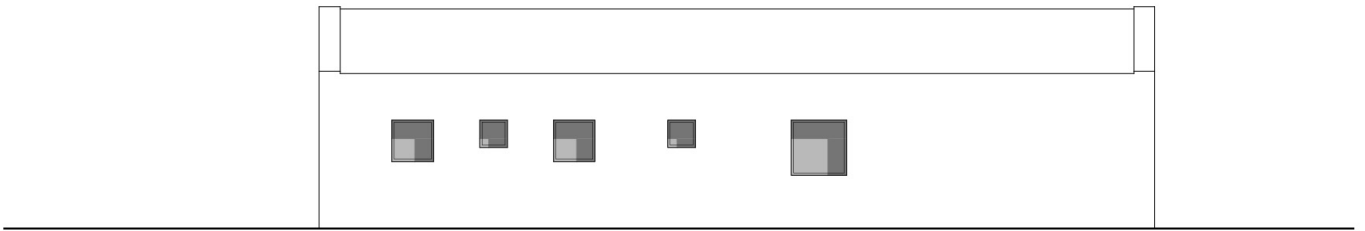

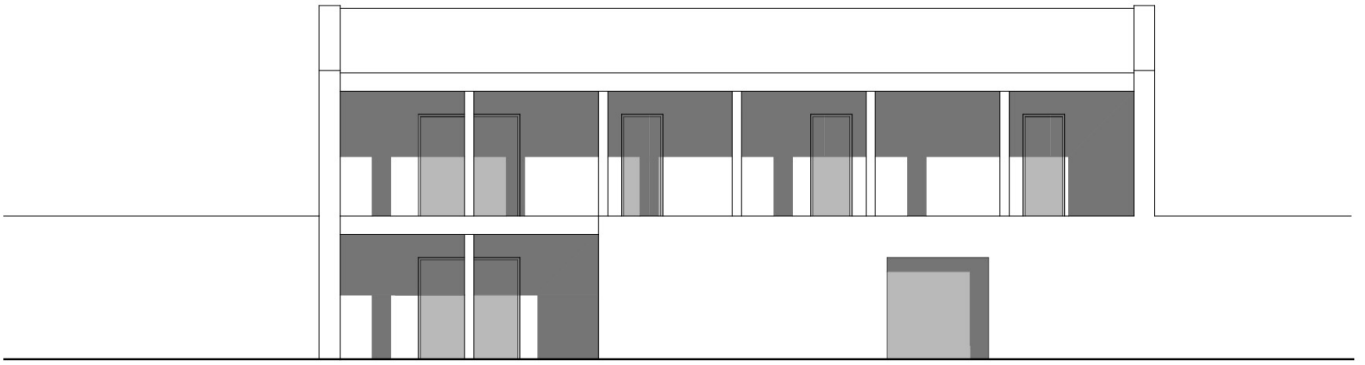

The house composition is based on a perfect geometry: a rectangular plan is surmounted by a simple gable roof, responding to precise measurements and transformations that respect pre-existing rules. The house is organized on two levels, one on the basement level and the other on the large loggia. The loggia is characterized by the rhythmic presence of metal profiles down to the lower level: it draws a large cross. The symmetry of the lateral elevation is unbalanced by the presence of the landscape that filters through one of the two openings.

Inside, the distribution foresees that all the main rooms have a privileged view to the south, while the service rooms are arranged along the north side. The elevations, marked by some regular openings, give the house a protective appearance. The austere house suddenly opens to the landscape and from the loggia, a real threshold between inside and outside, it is possible to see the Maremma up to the Giglio Island, as the last focal point of the horizon, where the land and the sea become indistinguishable.

Info and biography

'Giulio Basili architect' is an architectural firm based in Grosseto since 2010. It deals, in particular, with tackling problems, environmental limits in high-value landscape areas by proposing solutions in the context of contemporary architecture; urban redevelopment and renovation of public spaces and buildings in historic centers. Basili has participated in numerous architectural competitions as a chief architect and designer, obtaining reports and winning prizes and awards. His works have been published in various magazines and catalogs.

Giulio Basili (06/09/1979)

Architect, studied at The University of Architecture in Florence. In 2014 he received his PhD in Architectural and Urban Design at the University of Florence. Since 2002 he has participated in international architecture seminars and has won numerous competitions. Since 2014 he is a Contract Professor at the University of Florence, Department of Architecture. Since 2014 up to 2017 he has been a member of the Technical Scientific Committee of the University Center of Grosseto. He has published several articles and monographs on architecture magazines and catalogs.
