

The Fantales Kitchen by YSG

A warm, enveloping space layered with rich colour, subtle textural shifts and finely crafted, contrasting woodgrains.

Laminex[®] x YSG

Laminex® x YSG

Laminex has collaborated with one of Australia's most innovative interior design studios.

The brief was to create adjoining residential spaces, a kitchen and a living area incorporating a study zone, conceived as two parts of the same home, to reflect the new reality of residential design, that homes are places where we must be able to live, work and play. And to showcase how Laminex laminates can play a key role in delivering these interiors, bringing sophisticated colour and texture, incredible design flexibility and hardwearing durability to the finished project.

The team at YSG was given the entire Laminex Colour Collection to work with, and the interior palette they've curated draws together some of the very latest solid-colour Laminex decors with timeless classics and authentic woodgrains. The result is a stunning home interior that's rich, warm and layered. The kitchen will launch first, followed by the study and living space in February, 2022.

Please note: Copy has been supplied to provide you with an overview about the project. It is recommended you develop your own tailored copy for your channels.
