- 7. Nursery
- 8. Master bedroom
- 9. Master bathroom
- 10. Balcony

The STORY:

They were neighbors. They fell in love. As their love grew, so did their need for a larger apartment. So they decided to unite their two places into one. The idea was to bring together not only the living space, but also their lifestyles.

The Challenge:

To merge two apartments into one and maintain the quality of the interior with spaciousness and brightness in 100 sq m / 1080 sq ft.
 To create a space that is contemporary and functional, with custom-made furniture and natural materials - all of that at a reasonable cost.

The Result:

We fully exploited the advantages of an apartment with a south view, creating a very light, open area with flowing lines.
 By using smooth continuous shapes and a perfect transition of materials and colors, we define a trully singular experience in design!
 The result is a modern and tailored space, suited to the lifestyle of its owners!

Project Philosophy:

The World in 2015 is not just about the place or the people. It is about the experiences, which are always different. With this project we define new ideas of living - revolving design around passion, creating separate sceneries for the separate moods.

In this project we were looking for a contemporary vision, destinguished by quality and creativity. An apartment of passion, at a reasonable cost.

We believe we created a trully great space to inhabit!

ENJOY!

Separation of the apartment's functions and volumes is done visually through the strip of oak parquet climbing the wall and ceiling.

Having an open view from the living room to the foyer, connects the two spaces and makes the not-so-big apartment look spacious and light.

The contrasting mix of black and white, tamed by the warmth of the natural oak parquet, creates a calm, non-intruding environment. Marble, wood, black metal and cotton define a space that brings together nature and technology.

HE loves to read in the evening. Thus, we decided on a great Artemide ceiling lamp, which rotates 360 degrees and can be adjusted to light wherever one decides to sit. SHE listens to music. We introduced echopol - sound insulating and looking great.

The dream of our clients was a modern apartment, equipped with design and stylish pieces, where every object has its place. A place, where they can stay at Home, far away of the World. A sanctuary.

The living room is wide and bright, characterized by a mix of smooth lines, natural materials and neutral colors.

The space is arranged only with a few furniture pieces, all of which are tailor-made for this particular apartment. The oak table is hand-crafted, the sofa is produced to the desired softness, and all pieces have the same unique cast metal bases.

The lamps and hidden LEDs allow for different scenery, according to the mood and occasion. The sound insulation redefines sound experience, but it also gives the apartment a unique touch.

This is the area of the apartment, in which cooking, relaxing and communicating become one.

INTERIOR, CHARACTERIZED BY ARCHITECTURAL SEQUENCES RATHER THAN MERELY DECORATION AND FURNISHING

What the couple had in common was the love of great food. So, the concept of the apartment was centered around this passion. We created an elevated kitchen, with an isle floating halfway in the air.

The most important item in the apartment is the Island, placed in the middle of the space, literally raised in cult. Like a silent inhabitant of the house, it invites you to touch it, to feel it and to use it! While you are cooking, you are not merely a part of the conversation in the living area, but the host, the master or the DJ.

The Details are so important:
Refrigerator with a winery, multifunctional dishwasher, smart ovens and so many other hidden features!
All small things that make life easier.

The most intimate and personal space. The room is simple, but full of meanings. It reflects our clients' love for purity and cleanness. Every detail is selected with care: the lamps, the chair, the mirror. The natural oak wall reflects the warmth, which we want to implement into the global sense of coziness.

Much emphasis was given on the contemporary and trendy solution of putting the bathtub in the room. Now you can relax in the bathtub and enjoy the mountain view.

The hidden wardrobe is also custom, divided into two - with shelves and hangers for HIM and HER.

When they were still neighbors, SHE had a bathtub and they loved spending time in it, however tight it was. The solution - an amazing jacuzzi tub for two with head pillows for each - what a better way to chill.

This bathroom is clean and defined by love. A double jacuzzi bathtub, hidden cabinets, light and floor heating - all that you need after a hard workday.

The bathroom carries the living room elements, the cubic style and the floating objects, representing a coherent design throughout the apartment.

Going forward...

About us:

Pavel Yanev was born in Bulgaria in 1985 into a family of a civil engineers. While studying at The University of Architecture, Civil Engineering and Geodesy in his country, he worked in the office of a few local architects. After graduating in 2009, he started working on a small residential and hotel projects.

In 2010, he founded “ALL in Studio” with an office in Sofia. The studio creates spaces with the idea to improve the surrounding of the environment, however big or small it is. One of the latest projects they have completed is the Carlsberg Bulgaria office, which is the HQ of the company for Eastern Europe.
