

H-Fog

The first Professional,
Automated,
Unattended
and Blockchain certified
Sanitization System

Patent pending

H-Fog is the first sanitization BoT device, that following the entire sanitization process through Blockchain, certifies each treatment automatically, commencing from the authentication of the vaporized liquid.

UNATTENDED: greater security and safety for the operator, that does not need to remain within the room during the treatment.

AUTOMATED: M2M dialogue between H-Fog and SIMPLE Cloud software, and the Blockchain platform. Automatic execution of the treatment, with automatic generation of the Blockchain certificate following each treatment.

EFFECTIVE: independent International Laboratory Performance Certification based on EN 17272:2020 against Viruses (including COVID 19) and Bacteria.

LAB N° 0969 L

Membro degli Accordi di Mutuo Riconoscimento EA, IAF e ILAC

Accreditamento LAB n° 0969 per l'esecuzione delle prove riportate nell'elenco ufficiale di accredia, in conformità alla norma UNI CEI EN ISO/IEC 17025:2018.

EASY: easy to configure and operate through the H-Fog APP.

PLUG&PLAY: H-Fog Smart Bags are easily refillable, and safe and secure to replace.

SECURE: H-Fog Smart Bag refill's authenticity are guaranteed by Blockchain Encryption.

DESIGN: the first and only type of such a designed product.

COST EFFECTIVE: dramatically lower cost when compared to ANY manual sanitization treatment.
