*“Many years have passed  
and I still see you my mother,  
with the needle in your hand.  
Every day, in every vacant moment,  
you shape lines and colours in your love  
My trousseau. “*

*Alma de Luce®*

In traditional Portuguese society, crochet was taught over long winter evenings around the fire place. Starting from the basics, and evolving to complex and knotty artistic methods, this art was performed and preserved through sharing and defying, in a strong discipline environment and shared commitment, to a higher standard of recognised perfection in outstanding patterns. ALMA DE LUCE® is exposing the uniqueness of this trousseau made with crochet, whose cultural significance exceeds the value of each piece, and does so through the reinterpretation of standards using crystals. The combination between some of the material's shining intensity, and the pattern's astonishing detail, will definitely produce an outstanding sense of wonder nearby, no matter where.

#### DIMENSIONS

Width: 100cm | 39.7"  
Depth: 60,5cm | 23.82"  
Height: 171cm | 67.32"  
Weight: 340 kg

#### CRAFTSMANSHIP

Manual inlay of Swarovski® crystals;  
Handcrafted gold leaf;  
Thermo molded Corian®;  
Varnishing.

#### PRODUCTION TIME

10 to 12 weeks.

#### SPECIAL REQUESTS

Available in Cristal Swarovski® in the following colours- Capri Blue or Siam;  
Personalization and bespoke by price adequacy.

#### PACKAGING

Poplar plywood  
Cubage: 1.19x0.73x1.92= 1.67m<sup>3</sup>  
Weight: 440 kg

#### CLEAN AND CARE

The Corian® should be clean with a microfiber cloth and warm water, followed by a soft dry cloth. To clean smudges we recommend a microfiber cloth with a creamy soap. Then clean with a dry cloth. In the lacquered and varnished parts, to maintain brightness, clean with a moistened soft cloth followed by a dry cloth.

In the Swarovski® crystals use a dry soft lint-free cloth to maximize the brightness.

Do not use alcohol or derivatives for cleaning.

Do not expose the piece to direct sunlight to prevent color damage, and do not place in contact with hot objects or near sources of heat.

#### HANDLING CARE

Ensure that the base is straight and leveled to ensure the proper function. Before handling remove all objects within. Moving the piece out of the packaging, must be done by holding the bottom side in the middle, in each side of the piece and slide the piece.

The drawers have to be opened perpendicularly to the piece because a slight twisting may cause friction between the drawers.

We recommend that drawers must be opened one at a time. Before opening a second drawer, you should always close the first.

Do not overload drawers with a weight over 5kg.

Do not put weight or lean on the drawers when they are open.

Avoid placing sharp objects on the piece to prevent scratches.

In case of doubt please advise with a specialized technician from ALMA DE LUCE® through [info@almadeluce.com](mailto:info@almadeluce.com).

#### OBSERVATIONS FOR MOUNTING

Does not require any assembly.

#### OBSERVATIONS

The Swarovski® crystals colours are subject to supplier's availability.
