

Organic Kitchen Design Amendments

Design Overview

Wall Changes

The wall feature has been taken from concept 3 with a grey wall as a backdrop. This design allows for shelving to run down the length of the interior and gives the ability to display produce and other items. The chairs are matched to the same colour as the right hand wall.

Bar Changes

The bar area now has shelving above the coffee machine for glasses to be stored. The bread unit is now located on the front portion of the bar in clear view of customers. A till and scales have been added to the worktop on the left hand side as well as a menu holder on the left of the deli display.

Shelving Changes

The shelving blocks now include double height shelves to accommodate larger items without disrupting the aesthetic look of the display. It is in clear site of customers and can be easily reached.

Bar Changes

The sink behind the main bar is now a larger size to allow for blenders. The shelving unit behind the coffee machine is within reach and can store glasses and other items. The bar area allows for pastries to be displayed next to the bread shelving unit.

Shelving Changes

View of the shelving wall from behind the bar.

Wall Changes

The menu holder can be seen next to the deli counter.
