

GRIP

TABLE

bloomming

Design Table Grip. Industrial poetry combined with natural bamboo.

Design table Grip consists of a combination of table leg Grip and one of our bamboo table tops.

Why bamboo would you think? Well, bamboo is the future. It is the most beautiful and diverse material that we can choose for our design Table Grip. It belongs to the fastest growing plants in the world. It reaches its final length of up to 20 meters within a couple of months. It even has a speed of up to 1 meter a day during the growing season! In total it has a 4-5 year growth cycle.

Apart from sustainable sourcing our bamboo table tops are produced on a sustainable way. Not only for the product quality but also for the environment and the people involved.

And not to forget: Bamboo is very strong and stiff so ideal in combination with our Grip table legs.

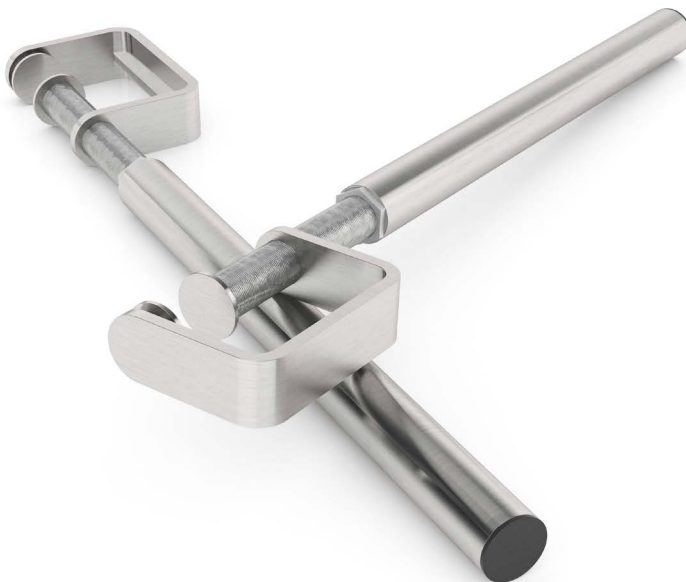

TABLE GRIP WITH BAMBOO SIDE-PRESSED THERMO TABLE TOP
