

## IKEA Hubhult

### Education and workspace

Looking at Råå Preschool, the term “becoming part of the landscape” comes to mind. In Råå, a small fishing village in the South of Sweden, Dorte Mandrup has designed a preschool with the utmost respect for its surroundings. With an entirely wooden surface, the building imitates the neighbouring sand dunes with its sloping and jagged roof as well as the traditional typology of the city’s small fishermen houses. The characteristic volume of the building dominates the interior experience with interesting shapes and views of the sea and the surroundings. The applied typology is challenged and used to create the best light incidence at all times of the year.

### Project

New construction

### Function

Global meeting centre

### Client

IKEA

### Client Contact

Lars Wingren: [lars.wingren@ikea.com](mailto:lars.wingren@ikea.com)

+46766190511

### Architect

Dorte Mandrup A/S

### landscape Architect

Dorte Mandrup A/S and 1:1 Landskab

### Engineer

Tyréns AB, Rejlers AB, Bengt Dahlgren AB + more

### Size

25.000 m<sup>2</sup>

### Status

Completed Sep. 2015

### Address

Svågertorp in Malmø, Sweden
