Green

***Green is nothing but our life***

*How We Can Save Green or How we Can Increase Green*

**Significant improvement in  
agricultural production**

*Protect Forest*

*Protect Trees*

*Increasing the Production of Yielding food  
products, Vegetables, Making Flower Gardens and  
Nature Gardens.*

First our aim is to protect green. Now a days green is very essential Factor, because where ever you have to go you couldn't find green, only you can see buildings, apartments, Institutes etc, Yah these are also important but right now we have to concentrate on green.

Green is our one essential factor of life. First our Aim is to give importance on Green

# *Effects on Green*

## **Changing Climate**

Climate  
Variation

## **Water Shortages**

Save  
Water

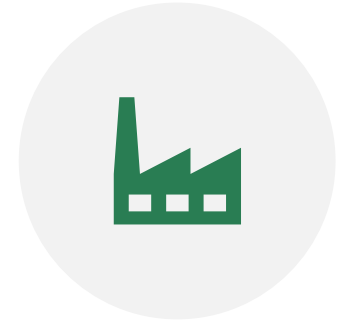

## **Longer Winters**

Effect on  
Green

## **New Terrain**

Choice

## **Industrial Impact**

Exactly
