

# THE CAVA PROJECT

A different version of the wine rack.

# CAVA IS A MULTIFORM PIECE OF WINE RACK.

It resembles a building in small scale made of columns and slabs, which can be split or expanded horizontally or vertically, depending on the space available.

Most of the times in constructions, the elements of electromechanical installations are "hidden" for matters of aesthetics. When it comes to Cava, though, the case is the exact opposite; the mounting of the piping takes up the lead role.

Cava series is a product inspired for small as well for larger spaces, as it can be divided or expanded accordingly through numerous combinations of designs, materials, colours and textures.

The use of Cava is not restricted in the display and storage of bottles since it can also function as:

- Cava-side table
- Cava-bar
- Cava-mini-bar
- Cava-tasting table

Cava - Side Table

Cava - Mini-Bar

Cava - Bar

Cava - Tasting Table

# CAVA SIDE TABLES

Trolley or free-standing wine racks 50cm high,  
featuring serving counter 40x25cm/ 40x40cm/  
54x40cm. Accommodate from 3 to 9 bottles.

# CAVA MINI-BARS

Wall-mounted wine racks 100cm high, featuring serving counter 40x25cm/ 40x40cm/ 54x40cm and glass racks. Accommodate from 5 to 20 bottles.

# CAVA BARS

## BASICS

Wall-mounted wine racks 200cm  
high, featuring serving counter  
40x25cm/ 40x40cm/ 54x40cm and glass  
racks. Accommodate from 9 to 32  
bottles.

# CAVA BARS

## LIGHTS ON

Wall-mounted wine racks 200cm  
high, featuring pendant  
light, serving counter 60x40cm/  
70x40cm and glass  
racks. Accommodate from 22 to 34  
bottles.

# CAVA BARS

## BIG

Wall-mounted wine racks 200cm  
high, featuring serving counter  
74x74cm and glass  
racks. Accommodate from 60 to 68  
bottles.

# CAVA TASTING TABLES

Wall-mounted wine racks 200cm  
high, featuring serving counter  
40x25cm/ 40x40cm/ 54x40cm and glass  
racks. Accommodate from 9 to 32  
bottles.

# CAVA CONSTRUCTION ELEMENTS

Each product of Cava range consists of columns, slabs and bottle holders which are easily connected in a mechanical way.

**Cava columns** are the vertical structural elements which, along with the slabs, constitute the frame structure of Cava.

**Cava slabs** are the horizontal structural elements which, along with the columns, constitute the bearing body of Cava. Moreover, they function as shelves for object display or drink serving.

**Cava bottle holders** constitute the building block of Cava. It is a synthesis of pipe holders, which - following a particular treatment - are placed in a sculptural complex, thus forming the body of CAVA.

**Cava** can accommodate **specially designed accessories**, such as serving trays, serving surfaces, wine glass racks or hanging lighting fixture, according to the model selected.

# CAVA COMBINATIONS

The simple assembly system of Cava allows for the easy change of columns, bottle holders or slabs, as well as for the division or expansion of the furniture into a smaller or larger composition respectively; thus the final product can be altered constantly through numerous combinations of designs, materials, colours and textures, depending on the needs of the user and the architecture and decoration of the space.

## CAVA COLUMNS

The columns are made of solid steel with galvanized coating or in the natural black colour of steel with varnish coating, in 3 different heights/ 50, 100 and 200cm high, of 18mm diameter.

Available either with a wheel base with or without brake for trolley Cava, or, with a fixed base with a rubber footpad for free standing or wall-mounted Cava.

Cava Galvanized Column

Cava Black Column with wall bracket for wall-mounted Cava

## CAVA BOTTLE HOLDERS

Each synthesis can accommodate from 2 to 20 bottles. Each Cava can feature one or more bottle holder syntheses, depending on the design.

Metal holders are made of galvanized steel and are lined with removable rubber for the protection of bottles. The holders are suitable for small or large bottles of up to 11.5cm diameter.

Metal columns bearing bottle holders are available in galvanized or in the natural black colour of solid steel of 6mm diameter.

The syntheses are available in single, double or triple format/ 37, 48, 60, 70 and 98cm high. Easy assembly between Cava slabs.

Cava Galvanized Bottle Holder

# CAVA SLABS

The slabs are made of solid steel, solid wood or marble with laser-cutting in different designs, colours and textures.

## Metal Slab

1. Solid Slab made of steel, 3mm thick.
2. Perforated Slab made of steel, 3mm thick, created with punching on special mould.
3. Retro design perforated slab made of steel, 3mm thick.

The retro pattern is inspired by traditional doily embroidery (cutwork and needlework) used for the decoration and protection of all horizontal furniture surfaces in houses, as of the Greek and French traditional folk art.

## Available options:

### a. Clear Varnish Slab

Clear varnish is applied on the sheet metal electrostatically, thus protecting steel from oxidation. When applied on a matte or glossy finish, it brings out the natural colour and the "water-like patterns" of steel. This process makes each clear varnish slab unique.

### b. Colour Slab

Electrostatic coating in Ral colours. Colour protects steel from oxidation.

### Available colours:

- > White (Ral 9016) with matte or glossy finish
- > Black (Ral 9005) with matte, glossy or fine gritty matte finish
- > Red (Ral 3020) with matte or glossy finish
- > Yellow (Ral1003) with glossy finish
- > Mint turquoise (Ral 6033) with glossy finish
- > Pastel green (Ral 6019) with glossy finish

Option for coating in any Ral colour and with any finish, upon request.

### c. Galvanized Slab

Slab protected by oxidation through electrogalvanization. The end finish of the galvanized slab forms "water-like patterns" and therefore each piece is unique. The tone might vary among orders made at different points in time. So, it is recommended to order together slabs to be placed in one CAVA.

Cava Perforated Metal Slab

Cava Retro Design Metal Slab

## Wooden Slab

### 1. Osb Slab

Osb/3 panel, 18mm thick, created with laser cutting. Treated with matte varnish for extra protection. OSB/3 (Quality 3 Oriented Strand Board) is a structural wood panel made of special type wood chips bonded together with resin of high resistance against humidity and heat, arranged in oriented layout.

### 2. Oak Slab

Single-layer solid wooden panels with lateral welding of oak wood elements, 2cm thick in total, created with laser cutting. Treated with matte varnish for extra protection.

Cava Wooden Slab- Osb

Cava Wooden Slab- Oak

## Marble Slab

Slab of marble from Dionyssos, 20mm thick, created with water-jet cutting. Treated with waterproof varnish.

Cava Marble Slab - Dionyssos

# CAVA ACCESSORIES

## Cava Glass Rack

Hanging glass rack base, 30cm long, made of stainless steel. Glasses slide in and out of the rack, this way saving space and making the rack user-friendly.

## Cava Serving Surface with or without handles

Acrylic (plexiglass) transparent serving surface with or without handles. It can be used as bench-serving surface for drinks.

It is placed over the slab on top of the bottle holder edges. Thanks to its flat transparent design, the structure looks minimalistic with the objects on it as if suspended in the air.

It is made of clear plexiglass, 8mm thick, with laser cutting.

The cut surfaces (edges) are evened manually in order to achieve the optimum plane finish and smooth texture. The edges are not varnished, but, matte treated so that the tray does not break when it comes into contact with substances containing alcohol.

It is hygienically suitable for the direct placement of food on its surface. Clear plexiglass is clearer than common glass, as well as break-resistant and lightweight in comparison to common glass of equivalent weight.

It is available in 3 dimensions:

- > Single surface, 322x177mm, fitting the single bottle holder synthesis
- > Double surface, 322x322mm, fitting the double bottle holder synthesis
- > Triple surface, 322x467mm, fitting the triple bottle holder synthesis

## Cava Pendant Light

Pendant light with decorative lamp Edison, round cable, lamp holder made of black glossy porcelain and transparent foot switch and plug.

Materials:

Decorative lamp Edison E27/40W  $\Phi$ 125x180mm 230V.

Round cable in black & white fabric 2x0.75.

Lamp holder made of black glossy porcelain.

Transparent foot switch and plug.
