

MAXIMUM AREA vs MAXIMUM VOLUME

- The volume aims to use the maximum area possible with the maximum volume in one single plan ;
- This principle seeks the comfort and generosity of space.

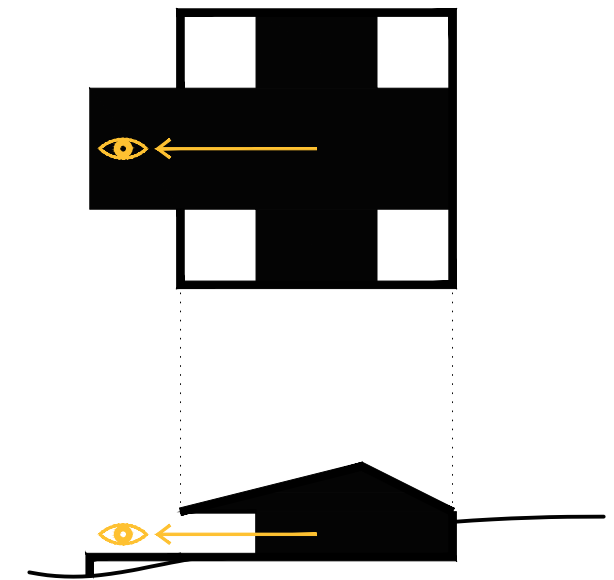

SHAPING THE VOLUME ACCORDING TO CONTEXT

- Shaping the volume to take advantage of the orientation, being able to profit from sun and light;
- The volume adjusts to the slope, in constant dialog with the hill.

SUBTRACTING THE VOLUME

- Excavating the volume with the creation of patios;
- The patios increase the light and air circulation in the interior and potentiate the intermediate spaces.

EXPANDING TO THE EXTERIOR

- Creation of a platform that expands the social area into the exterior.
- The introduction of the porch creates an intermediate space between the exterior and interior.
