Bloomming's Facet consists of a modular system, it is available in any desired size and can be used as a partitioning room divider or in front of a window instead of using blinds.

Materials

Hanging Room Divider Facet is designed to be a sustainable product. Facet consists of high-quality injection moulded materials that are strong and durable to ensure the longevity of everything we create.

The smart clicking system not only makes it easy to assemble this room divider, it also makes taking it apart effortless.

The whole screen can be taken apart, separating all the different materials that make up the hanging room divider. This makes it possible to fully recycle Facet or to reuse specific parts of it.

Facet is fire retardant, UV resistant and anti-static.

Installation

Hanging room divider Facet comes with a clear 6 step instruction guide.

Due to its smart modular design, assembly and installation is a breeze.

Attachment

Facet can be attached to almost any type of ceiling. The standard ceiling attachment will leave 23cm of space between the ceiling and the beginning of the hanging room divider screen. We offer the possibility to adjust the amount of space according to the requirements of your project.

The ceiling attachment is available in brushed stainless steel or in white powder-coated aluminum.

Patterns

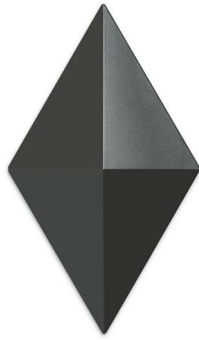

Facet's unique adjustable design enables you to change the way it looks in your space. The individual pieces that make up the screen, can be turned around. By doing this you can change the pattern slightly to get a unique effect.
