

EASY
BOY
STUDIO

The EASY BOY STUDIO creates and produces articles that give another color to the decoration of spaces and appeal to the emotional factor that results from that chromatic potencial. The contemporary lines expect to be another ally of the goal that guides the project. The products are designed by the portuguese designer Carlos Nunes and result of the author's experience in the creation and production of articles that are based on acrylic and in his deep knowledge of this material. Production is not an industrial process. It's piece by piece handmade work.
