## Reforming Energy Reforming Lives

Green Energy & Biotech  
**GEBC**  
reforming energy. reforming lives.

GREEN ENERGY & BIOTECH (PVT) LIMITED has come up with solution for both the issues of production of alternate energy and removal of Food Waste.

The joint venture is into the production of

- Electricity
- Cooking gas
- Automobile fuel

as the main products while using the scientific biological treatment of organic waste and

- Organic liquid fertilizer
- Organic solid fertilizer

as the by-products

GEBC has the complete solution for waste treatment, environmental and social issues like saving landfills by sloughing organic waste, reduction of carbon emissions, hygiene raised by waste removal, etc. and generation of alternate energy in the form of electricity, cooking gas and automobile fuel.

### FROM KITCHEN TO KITCHEN

Domestic Bio Waste Treatment Plant.

Kitchens are where most organic waste is generated in our world society. GEBC has recognized this fact and has over a period of time, developed domestic Biogas plants of various sizes, which convert the kitchen waste into cooking gas, for which gas out of kitchen in form of waste which otherwise would have occupied lands and could have caused hygiene issues, comes back in the form of clean and green energy.

### KEY ADVANTAGES

- Since we have various sizes of projects, everybody right from an individual to corporate can be a proud part of this Go Green Venture.
- The liquid and solid fertilizer by-products can replace the chemical based fertilizers for ground water clean and better growth of flowers and vegetables.
- Depending upon the availability of space, the plants can be placed either in the ground.
- Waste management was never so easy and comfortable.
- Save mother earth by avoid dumping the food waste and conservation of soil and ground.
- Reduction of carbon footprint.
- Works against global warming & ecological imbalance.
- Development of Alternate Source of Energy & reduce dependence on conventional sources, limited in resource.
- 100% hygiene.
- 100% safe in handle.
- Comfortable project size from 1 cubic meter to 500 metric tons capacity.

### OTHER HIGHLIGHTS OF BIOTECH

- No risk of implementing a new technology for the first time because this is a proven technology from Biotech, India.
- Dr. Sujata, director biotech had started his research and implementation of these projects way back from 1985 & the company became commercially operational from 1994.
- The plants have a life of 15 to 20 years.
- Maintenance required is very minimal.
- The technology, the logo, the concept & the trade mark are patented and cannot be copied by anyone else in the world.

### TECHNICAL DETAILS OF 1 CUBIC METER FAMILY SIZE BIO WASTE TREATMENT PLANT

- Waste Treatment Capacity: 3 Kg Solid waste & 30-40 Litres Waste Water
- Volume of Digester: 1000 litres
- Suitable for: 2-3 member family
- Space required for the installation: 1.25-2q Metre.
- Gas generation (per day): 1-2 Cubic Metre which is equal to 10-15 Kg LPG
- Liquid fertilizer: 2 Litres per day
- Solid fertilizer: 30 grams a day

# SGS INDIA BROCHURE

## INTRODUCTION:

At SGS, we continually strive towards not merely meeting but exceeding our Clients' expectations. In our persistent endeavour to be the best, we are pleased to introduce our new integrated service offering aimed at providing end-to-end sustainable building consultancy.

As part of this service offering, SGS will provide technical guidance and professional support at each and every stage of the building design and construction, right from its inception to eventual operation.

Our in-house team of experts boast of a wide-ranging cumulative experience spanning a gamut of sectors including industrial, mix-use development, housing, retail, corporate buildings, commercial buildings, hospitality, healthcare and sustainable architecture & design.

Owing to our global presence and extensive capabilities, we have successfully delivered green building and architectural solutions for a multifaceted range of Client sectors, which include some of the world's leading conglomerates.

Whatever your building requirement may be, there is a strong likelihood that we may already have the most befitting solution to it.

# SHIBAM VENTURES BROCHURE

## About Us

Shibam Ventures and Building Materials (P) Ltd is a company focused in providing comprehensive solutions to every client. Initially, we started with waterproofing ventures and then gradually entered into the field of Roofing Shingles and Thermal Insulations. Since the inception in the year 1975, we have never looked back, gaining ground with addition of innovative products in our portfolio. Presently, we are serving various sectors, ranging from manufacturing to service industry. Shibam gives equal preference to retail customers and high net worth clients.

Regarding our HR policy, we have a dedicated team of professionals who are committed to achieve their team goals and this has helped us to give efficient and timely service to our clients even during the crisis period. Also, we have an exceptional business mobility with our suppliers like (GAF/USG/STYBASS/POBULTS, etc.) and this has aided us to procure the right product at the right price as well.

Along our core strengths, the first and the foremost is our goodwill amongst the partners followed by our management, strategic location of office and warehouses.

With the wide knowledge, understanding and practice, we honestly claim our expertise in providing solutions in Waterproofing, Roofing Shingles and Thermal Insulations.
