

WINCH DESIGN

Unveiling the Largest Superyacht in the World

Winch Design is thrilled to announce our collaboration in the exterior and interior design of what will be the largest superyacht in the world, *M/Y Somnio*. Stretching 222m in length, with a gross tonnage of 33,500 GT and breaking all the records in the book, this unprecedented feat of design and engineering is set to change the course of ultra-luxury travel forever.

A collaboration between two of the world's most esteemed design and architectural studios, Winch Design and Tillberg Design, *Somnio* will be the first ever 'Yacht Liner', featuring 39 exquisitely high-end apartments on board, offering owners the perfect combination of the superyacht lifestyle and 7 star hotel service. Amenities onboard will include a spectacular 10,000-bottle capacity wine cellar and tasting room; a choice of restaurants and bars; and an onboard beach club featuring water-sports facilities. A lounge in the ship's bow will also provide for spectacular views when sailing in scenic areas or when entering port.

Environmental sustainability and ocean research are also key focuses of *Somnio*, which is being built with the latest clean engine technology and advanced onboard equipment to help scientists and marine experts conduct their investigations.

Due for launch in mid-2024, *Somnio's* construction is now underway at VARD in Norway, part of Italy's world renowned Fincantieri Group and we very much look forward to sharing more information about this game-changing megayacht of unimaginable scale very soon.

"Embarking on such a spectacular and pioneering project brings a huge amount of pride and excitement for the Winch Design team and follows an enormous amount of hard work already achieved. It's a privilege to be working with Tillberg Design and VARD shipyard on what will be a revolutionary landmark for the industry. We look forward to working closely with all those involved and can't wait to see her develop!" – Jim Dixon, Director of Yachts & Aviation at Winch Design

"Somnio will be the only residential superyacht in the world and has been designed to exacting standards that are commensurate with a life of opportunity. Owners will share a truly unique lifestyle at sea, with a hand-picked crew and a never-ending global itinerary of carefully selected destinations and experiences befitting a yacht of this nature." – Captain Erik Bredhe

WINCH DESIGN

– end release –

Winch Design: *Winch Design was founded in 1986 by Andrew and Jane Winch as a specialist Exterior and Interior Yacht Design Company. Over time, the company has added aviation, architecture and interiors teams to its core yacht portfolio and now employs over 110 people, working on a number of international design projects on land, in the air and at sea. Based in an old fire station on the banks of the River Thames, Winch Design celebrates thirty-five years in business this year.*
