CAPO-SPARTIVENTO

CAPO SPARTIVENTO LIGHTHOUSE

Welcome to THE Lighthouse. The idea of hospitality that we like to offer is to let you feel at home by trying to meet pleasingly all your desires. For this reason we chose not to have a reception or a fixed menu at specific times. Our Chef and our Maître, chatting with you, will be inspired about your meals and will suggest the best wines of the island. This is for you to enjoy the best of the Sardinian cuisine, enriched by the creativity of our Chef.

The Lighthouse is a passion for all of us, and far beyond just a job. And that's why we would like to offer more than a simple vacation, but a unique experience. Welcome to your home.

Description

Capo Spartivento Lighthouse was built in 1856 by the Italian Navy. During the last war it was machine-gunned by American planes and, later on, it functioned as the Lighthouse guardian residence until the late 80s. It has lit the way of seamen for over 150 years, slicing the darkness like a sword with its welcoming beam of light; it has now become a luxury guesthouse without losing its primary function. The Lighthouse is open all the year round, and it is an amazing location both in sunny summer and in winter thanks to its charming stormy weather.

Location

The property is located 50 km from Elmas Airport and the City of Cagliari, on a promontory called Capo Spartivento, in the area of Chia. This is the most southern tip of the Island: a completely wild and unpolluted area, with no other structures around, covered with Mediterranean bushes, and surrounded by fine, heavenly white sandy beaches. A secondary dirt road leads to the Lighthouse on top of the cliff above the sea.

Exterior

At the back of the building there is a 3000 sq. meters garden with a huge centuries-old olive tree and a big lawn where you can sit on white sofas in front of a 12 meters fireplace and a barbecue area. In the middle of the garden, there are eight glass gazebos (16 sq meters each) and an open air sheltered area with tables where it is possible to have lunch while enjoying the panoramic view of the sea and the hills far beyond or to have dinner under the flickering light of the Lighthouse lantern. In the front of the building there is a large wooden platform, looking out the cliff above the astonishing view of the sea. In the middle of the platform, there is an infinity pool (14m long, 6m wide and 1,3m deep), equipped with two Jacuzzi water jets. Fine ancient Turkish carts have been turned into beds to sunbathe on. Elegant white leather sofas with 4 white sunshades create a perfect area to have Breakfast, afternoon Tea, or to enjoy an aperitif in front of the sea admiring the sunset when the lantern is on and the goats invade the surrounding promontory.

Interior

Ground Floor: the structure is about 600 square meters. Through the imposing arched glass front door, it is possible to admire the sea. On the upper part of the arch, an old ornament with the initials in capital letters of King Vittorio Emanuele is still visible. The hall is large and elegant (120 sq m) with red, Murano crystal chandeliers. Five arches in the ceiling mark the border between five different areas once separated by walls, now replaced by monumental iron trusses, similar to the ones used in ore mines. Here there are four Luigi XVI-style big settees, a fireplace, an ancient mirror and a big ancient table and four round glass tables for four. From the center of the wooden floor hall, a cast iron spiral staircase leads to the old underground cistern (water supply from a well), which is now functioning as a wine cellar. A stone path leads to the restrooms, a business area, a professional kitchen, and a small office. In the bathroom on the ground floor, the wash basin is held up by an ancient mortar found in the Mongolian countryside. The business area is equipped with a PC, internet access, fax, telephone, and hi-fi stereo music System. First Floor: a stone spiral staircase leads to the first floor. Here you can find a reading room with a small fireplace, a sofa and a big old chest used as a bookshelf and four smaller en-suite rooms (35sq. m each) with wooden floor two which with sea view. They are furnished in a modern bright white style and round suspended beds. Two white glass walls separate the room to the wardrobe and the bathroom.

Two of the suites have a view of the hill at the back of the Lighthouse. They composed of three separate rooms: a drawing room in Provencal style with a sofa and TV, a bedroom with a canopy bed and a bathroom.

Mail info@farocapospartivento.com

On the second floor, there is the terrace (250 square meters), where the beacon is located. The door to the beacon is on the third floor but access is prohibited by the Navy to which it still belongs. The terrace is equipped with four big sofa beds to sunbathe or lie down on to look at the sky at night. A telescope is available for a closer look at the stars and the moon.

From the terrace it is possible to enjoy a breath-taking 360-degree view of the surrounding area. Two additional mini-flats outside the main block of the Lighthouse are also part of the propriety. They are on two floors, 50 square meters each, and have a sitting room on the ground floor and a bedroom on the first floor. A glass roof allows admiring the beautiful starry sky at night. These buildings, now restored, once housed the tanks for the gas used to fuel the beacon of the Lighthouse.

Total number of beds: 12. All the rooms are equipped with king-size bed, a bathroom, big mirrors, a mini bar, a Satellite LCD TV, a DVD player, air conditioning, a safe, Internet connection, and 3 sets of bed linen and towels.

Eco sustainability

Capospartivento Lighthouse is equipped with a solar panel system which uses solar power to heat the water. Water is supplied by tankers and kept in the underground INOX cistern (40,000 liters available per day). However, the water is not drinkable. The structure is equipped with phyto-purification system for the drainage water, which recycles the used water to irrigate the gardens.

Natural Attractions and Leisure Activities

The white sandy beaches of Cala Cipolla and Su Giudeu, are easily reachable within walking distance. The ruins of the former semaphore tower, once a weather station, on the hill where the Lighthouse stands. From there you can enjoy an astonishing panoramic view of the coast. The ruins of the former harbor, part of the Lighthouse property, dating back to World War I, and to the surrounding small inlets with small sandy or pebbled beaches, within an easy walking distance. Crystal clear waters for Snorkeling or scuba diving activities. Mountain biking along the coast to reach the beautiful beach of Tuerredda. Horseback riding along the beach of Chia and its lagoon, home of the pink flamingos. Cross-country excursions to different sites: the archaeological ruins in the interior of the island, the old abandoned mines of Piscinas, the beaches around Capo Teulada and all around the island; Boat or sail trips to the beaches of Capo Teulada, Capo Malfatano and Cala Zafferano (only reachable by boat); Kite surfing on the beach of Chia; Golf at "Is Molas Golf Club" (10 minutes by car).
