

## Hiramoto Design Studio

**Philosophy:** We at HIRAMOTO DESIGN STUDIO don't impose our designs on you, Because we think that the essence of design must be discovered from your own projects. So we take feedback and research from the owner, their business plan, their business strategy, the site, company history and current trends, and then we can certainly provide the one and only answer to your project needs. We adapt this solution and build a concept which is valuable to society, so we can build "a sustainable strong design" because we start from the phase of creative-direction.

We believe in the power of design.

Director: **Hideyuki Hiramoto**

Designer | Architect

We have worked on many commercial projects such as hotels, restaurants and retail spaces, not only in the area of architectural design, but also interiors, products and graphic design areas. So we have no boundaries to our design possibilities. We are responsible for creative direction for various firms from the entry phase of initial branding-construction, so we can provide a comprehensive design solution.
