

Estudio Lamela is one of the largest Spanish architectural firms, having an impressive past of over 60 years of extensive professional experience encompassing more than 1600 projects. The company offers design services for transportation facilities, sports complexes, housing, hospitality, offices, retail and urban projects. As a pioneer in multidisciplinary and teamwork, the company uses the most advanced technologies and techniques, its prime concern being the efficient use of energy and other environmental issues.

From offices in Madrid, Warsaw, Mexico City and Doha currently the company is staffed by a flexible and dynamic team of more than 80 professionals with different cultural backgrounds who are committed to the development of major projects and an ongoing search for innovative techniques, with the objective of achieving avant-garde results and high architectural quality. Additionally, the firm relies on the collaboration of appropriate specialists for each project and phase in the fields of structures, special and conventional services, environmental support, landscaping, health and safety, etc. Currently the company points out sustainable design and implements sustainable solutions into every project in collaboration with special advisors in LEED and BREEAM certification.

Estudio Lamela is acknowledged as a **specialist consultant in transportation projects**, not only in Spain but also worldwide. Due to its wide experience in development of terminal buildings and adjusted facilities, the company has provided solutions for the most reputed Clients. The most important projects in this sector include: The New Terminal Area at Madrid-Barajas Adolfo Suárez Airport, one of the most ambitious projects in Europe, in collaboration with the team of Richard Rogers Partnership and the engineering companies Initec and TPS, the Extension of the Warsaw Airport, the biggest public investment in Poland, the Extension of the Gran Canaria Airport, refurbishment of Terminals 1 & 2 at Madrid-Barajas Airport and currently the Extension of Tijuana Airport.

Estudio Lamela is also active in other parts of the world in Europe, America and the Middle East. In Europe, Estudio Lamela is also part of a Pan-European network of architectural firms (EAN), which is the main pioneer international network consisting of more than 700 professionals.

Since 2003 Estudio Lamela has occupied a leading position among the most important architectural firms in the world by the prestigious magazine World Architecture. The recognition of Estudio Lamela has increased over the past years, with more than 35 First Prizes and Honourable Mentions in national and international competitions which have given its projects great repercussion in important technical magazines.

Estudio Lamela in its search for consistency of quality and efficiency for our clients, is in possession of the international certificate of IQNet and BUREAU VERITAS UNE EN ISO -9001: 2015 and ISO 14001:2015.
