RAY SHELF™ THE REVOLUTIONARY SHELVING SYSTEM

RayShelf™ is an unprecedented shelving system, designed by the Italian architect Matteo Gerbi. The motivation for the design was to create a practical, functional object for walls that doubles as a fully customisable art installation. Through different combinations of the variously-shaped support units, and a plurality of bars, which replace the classic board design, the user may create numerous arrangements to suit specific needs, spaces and aesthetic tastes. RayShelf™ is entirely manufactured in the UK.

SPECIFICATIONS

INSTALLATION

RayShelf™ is beautifully easy to install; the holes on the back panel allow the user to simply screw the support to the wall, as with a standard bracket, and insert the bars.

It is important to visualise your chosen composition before commencing installation. A visualisation grid is included in the packaging, or may be downloaded from www.rayshef.matteogerbi.com

- Colours: standard colours are listed above. Bespoke colours are also available; please contact us to discuss pricing and your requirements at store@matteogerbi.com
- Screws are provided in the same colour as your chosen supports. Plugs are not included.

ALLOW YOUR IMAGINATION FREE REIN

Through its system of shapes and bars, RayShelf™ gives rise to endless combinations and configurations. Play with various compositions until you find the one that works for you!
