

Text Kickstarter campaign

KAIAO Lights are customizable lamps. Each shade is made out of 12 pieces of paper and can easily be printed or colored by hand.

We are the designers of KAIAO Lights: Nicole, a professional lighting designer, and Andreas, a professional product designer with a big passion for DIY.

It all started with building single lamps for friends. After receiving great feedback, we decided to start serial production. That's why we are here on Kickstarter and we need your help.

We produce all the needed parts of your KAIAO lamp and send them to you as a ready to assembly kit. You will be amazed how easy assembling of a KAIAO Light will be.

Instead of buying a kit, you can also make your own KAIAO Light by yourself! Only on Kickstarter, we reveal all our secrets. During our campaign you have the opportunity to buy our DIY manuals, including the shopping list and blueprints. Take the chance, this offer is strictly limited to the duration of the Kickstarter campaign!

Only on Kickstarter, we reveal all our secrets. Take the chance to get the step by step DIY manuals and the blueprints. Use your own 3D printer or order the plastic parts easily online.

To show you the potential of KAIAO Lights we created 17 unique shade designs. The designs are ready for printing with ordinary color printer and can easily be exchanged. This way the lamps adapts to your style and mood all the time. These 17 lampshade designs are limited to the Kickstarter campaign. So they are available only here and now. Don't miss your chance! :)
