GIULIO BASILI ARCHITETTO
www.giuliobasili.it

The plan distribution is characterized by the presence of two bases. The two square bases fit into the hilly landscape, one behind the other. The first facing the valley contains the swimming pool, the second is a kind of foundation element for the house. There is a very simple internal distribution.

Visually the gabled roof looks balanced of course, it's the archetype of a house and this image is also forced by the presence of two traditional elements.

The first of the two is the loggia that lightens the main façade: the profile of the side stone walls and the large beams of the roof draw the façade.

The stairs, the second element, are carved on the side of the base and exceed the height difference between the ground and that of the house. The internal distribution is not organized in a spatial hierarchy, the rooms seem to be a single nucleus facing outwards to favor a constant view of the landscape.

Info and biography

'Giulio Basili architect' is an architectural firm based in Grosseto since 2010. It deals, in particular, with tackling problems, environmental limits in high-value landscape areas by proposing solutions in the context of contemporary architecture; urban redevelopment and renovation of public spaces and buildings in historic centers. Basili has participated in numerous architectural competitions as a chief architect and designer, obtaining reports and winning prizes and awards. His works have been published in various magazines and catalogs.

Giulio Basili (06/09/1979)

Architect, studied at The University of Architecture in Florence. In 2014 he received his PhD in Architectural and Urban Design at the University of Florence. Since 2002 he has participated in international architecture seminars and has won numerous competitions. Since 2014 he is a Contract Professor at the University of Florence, Department of Architecture. Since 2014 up to 2017 he has been a member of the Technical Scientific Committee of the University Center of Grosseto. He has published several articles and monographs on architecture magazines and catalogs.
