

Formworks in coated polystyrene

Off-site casting of a 3D wall and floor

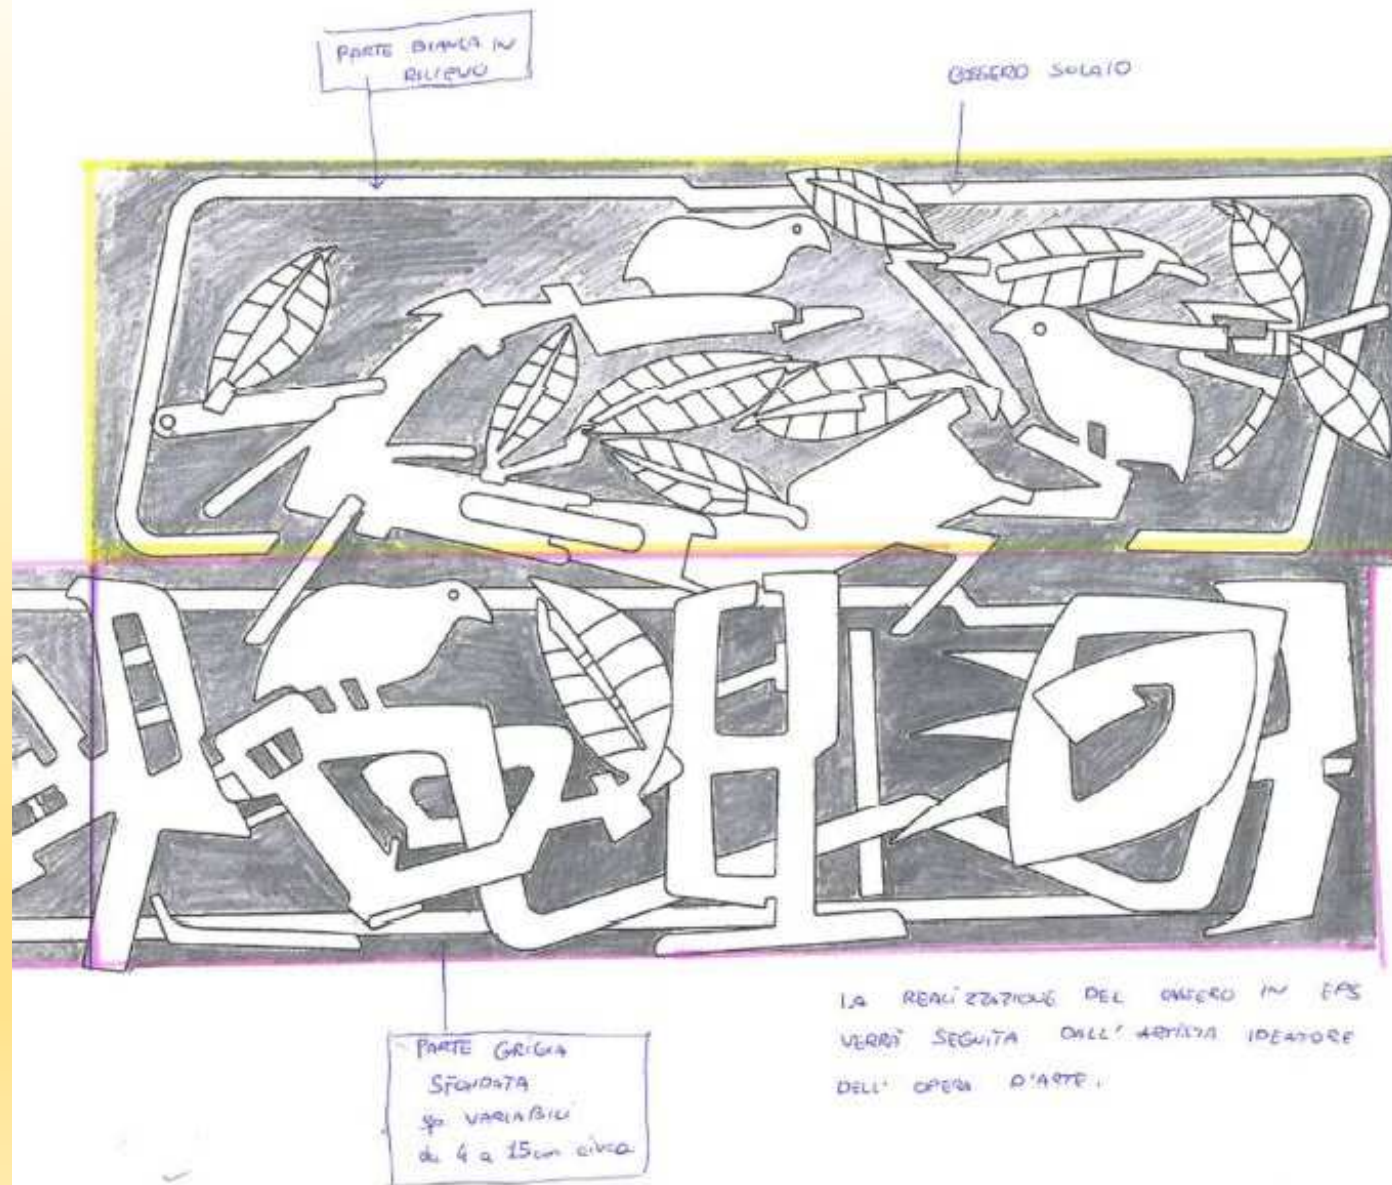

The client's request:

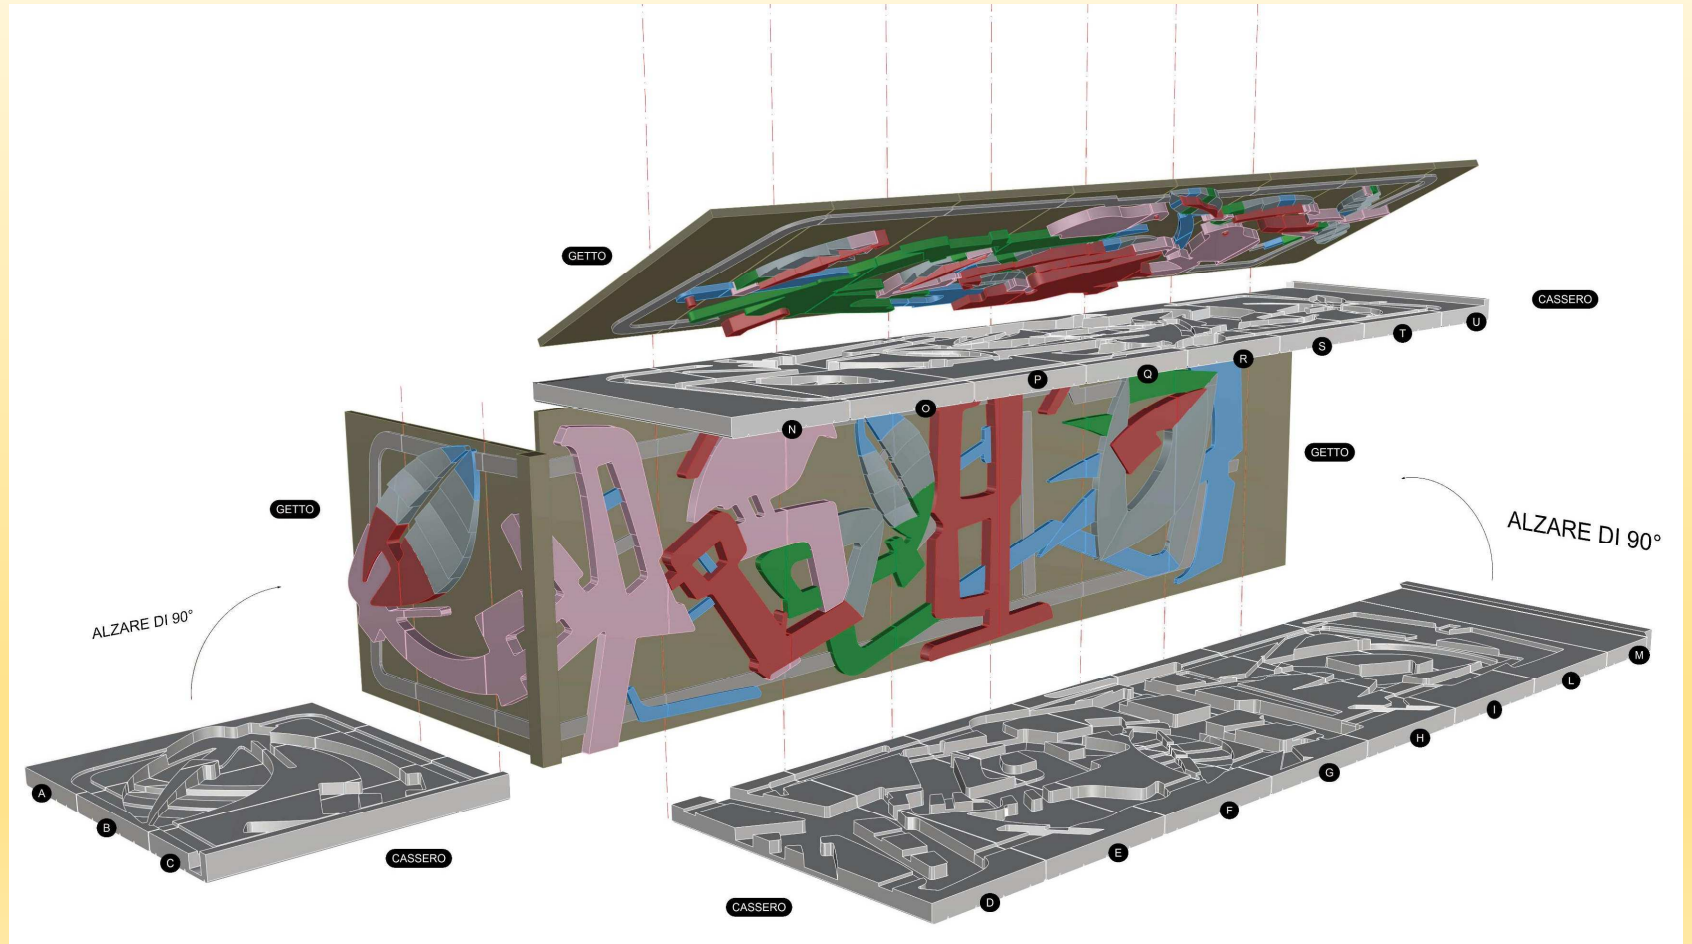

- Realization of a wall, reproducing artist Paolo Tait's artwork, for the new elementary school in Levico Terme
- White cement
- Visible surface

Our proposal:

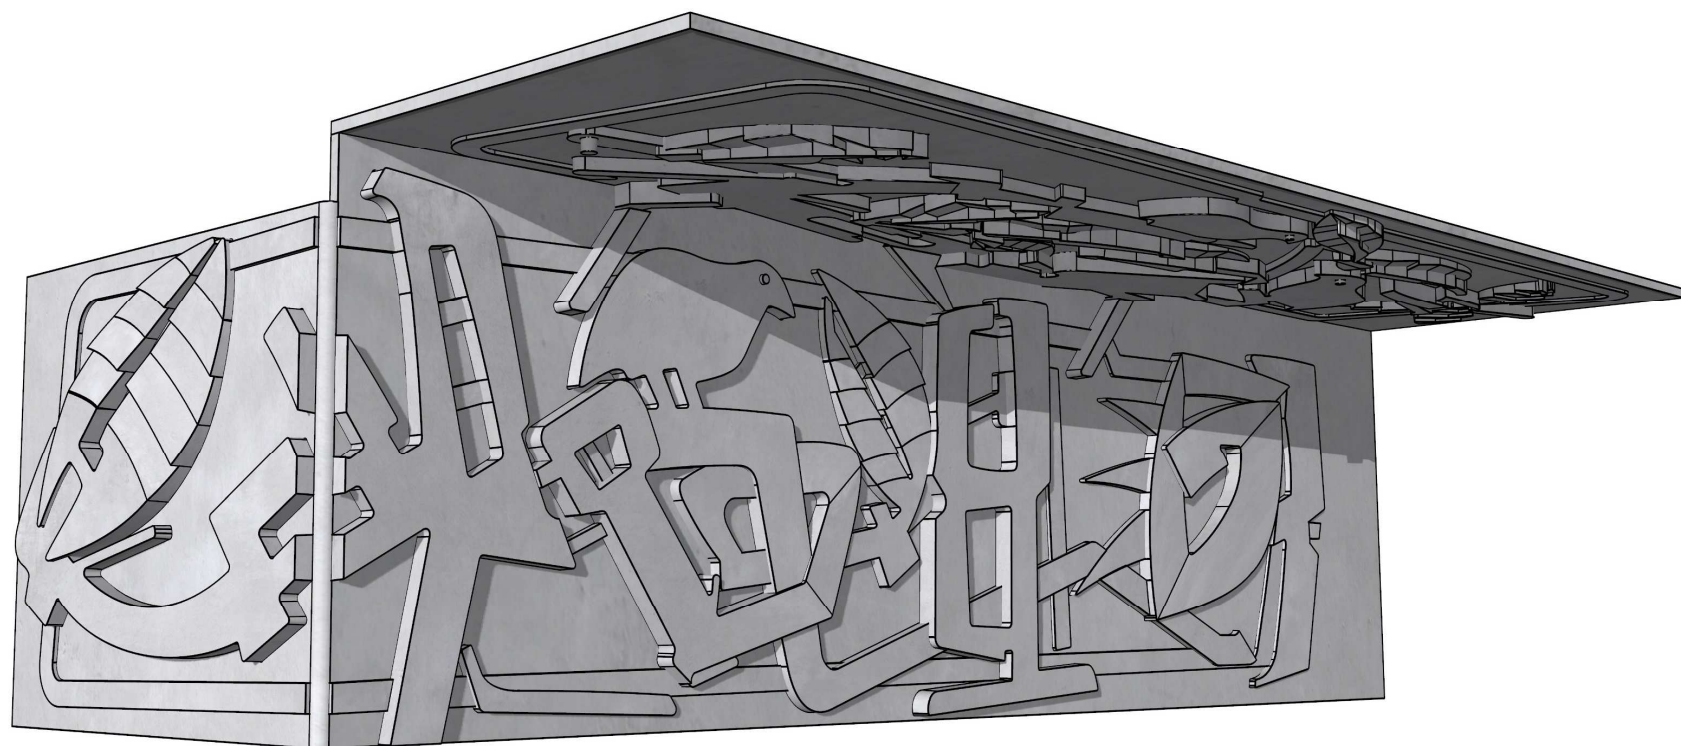

- Formwork in polystyrene for the off-site casting realized with single-use polystyrene, with a density of 50 kg/cbm
- Milled following the artist's directions
- Design and manufacture of the 3D model of the artwork

Our 3D model
