About BLOXHUB

BLOXHUB is an urban innovation hub that brings together companies, organizations and researchers to co-create solutions for better cities. BLOXHUB is founded on the belief that the challenges of global urbanization and climate changes requires a new collaborative approach. With members such as Gehl Architects, C40 Cities, Institute for Urban Economic Research, The Danish Design Centre and the Danish Architecture Centre, BLOXHUB is set to be a Nordic launchpad for future urban solutions and a gateway to the Danish and Nordic markets for international companies.

BLOXHUB is located in the heart of Copenhagen, Denmark, one of the most inspiring urban environments in the world. Here, the members develop global solutions with a Nordic approach – that cities should be created for people.

The Urban Challenge

By 2050, two thirds of the world's population, approximately 7 billion people, will live in cities. This massive global urbanization presents a major challenge to the way we design, build and think of urban environments in the future. BLOXHUB is designed to meet this challenge.

Torben Klitgaard, BLOXHUB Director:
"By bridging architecture, design, construction and digitalization, we can unlock the full potential of cities as engines for growth and development and as places where people want to live. A stronger collaboration across sectors is crucial to creating better cities."

Co-Creating Better Cities

With 550+ desks in a state-of-the-art building, designed by OMA, access to a global community of hubs, tailored matchmaking workshops, accelerator programs and export services, BLOXHUB creates an environment for sharing ideas, thoughts and opportunities. In short, BLOXHUB is a platform for connecting, sharing and scaling businesses that create better cities.

BLOXHUB is co-founded by the philanthropic foundation Realdania, the Ministry of Industry, Business and Financial Affairs and the City of Copenhagen.

FACTS ABOUT BLOXHUB

What is BLOXHUB?
BLOXHUB is an urban innovation hub that tears down traditional silos and brings together companies, organizations and researchers to co-create solutions for better cities. BLOXHUB consists of a coworking space with 550+ desks in Copenhagen, Denmark, and a global community of companies, researchers, cities and relevant hubs.

Why BLOXHUB?
BLOXHUB is founded on the belief that the challenges of global urbanization and climate change require a collaborative approach. By creating an ecosystem of stakeholders within urban solutions, BLOXHUB provides ideal conditions for connecting, sharing and scaling businesses that create cities for people.

Who are the BLOXHUB members?
BLOXHUB is a co-creation space for everyone working with building solutions for future cities. Our 160+ members span across sectors such as design, architecture, construction and digitalization. Current BLOXHUB members include Gehl Architects, C40 Cities, Institute for Urban Economic Research and The Danish Architecture Center.

Where is BLOXHUB?
The BLOXHUB co-working space is located in Copenhagen, Denmark, one of the most inspiring urban environments in the world. A global community of hubs, including in Helsinki, New York and Paris, gives members access to working and networking abroad.

What is BLOXHUB Co-Creation?
At BLOXHUB, we believe great minds think together. In our co-working space and through the global BLOXHUB community, we bridge stakeholders from architecture, design, construction and digitalization to build better cities.

How does BLOXHUB Co-Create?
BLOXHUB is more than a desk in one of the most modern office buildings in the world. With access to a global urban community, customized matchmaking, advanced tech labs, accelerator programs and export services, we create an environment for sharing ideas, thoughts and opportunities. We connect, share and scale.

Why does BLOXHUB focus on Urban Tech?
Many tech companies are concentrated in silos such as Silicon Valley or dedicated tech co-working spaces. In BLOXHUB, we bridge the gap between technology and the industries, it transforms. The construction industry must speed up its digital transformation to adapt to Industry 4.0 and its customers' needs. With labs featuring the latest in construction technology and dedicated workshops, BLOXHUB facilitates this transition.
