"Little England" Bilingual Nursery and Pre-School

Design Agency: massimo **adiansi** architetto

Designer: Massimo Adiansi

Photographer: Andrea Peroni

The project was incorporated into the wing of an old restructured farmhouse with a strongly distinctive original structure. In the ground floor there are two nurseries and the service areas. The three sections of the pre-school are on the

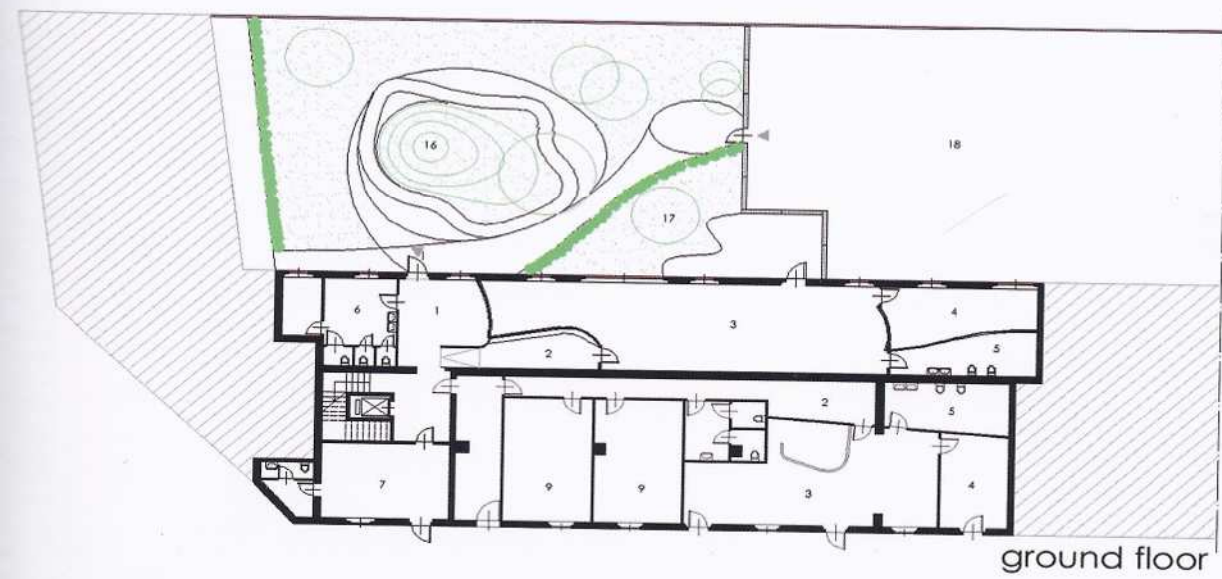

first floor.

While the nurseries are two single open spaces, the pre-school has been designed around a large central space for the motor activities. Around this area there are three classrooms, an

"atelier" for creativity activities, a library and a room for sensory experience.

Parts of the project are the colors, chosen on the most up-to-date theories, and the lights, chosen to be like a "part of the game".
