**The steel joinery and shower cubicles were made by** Metal Madness

**Mural on the terrace was made by** <https://www.instagram.com/mollymural/>

### **About the project:**

The penthouse was built as an extension of a restored tenement house from 1912. The planned functional solutions required a general renovation of all rooms. The interior is furnished with pieces designed by Loft Kolasiński: wooden window panels, bed, mirrors, chests of drawers, benches, kitchen and bathroom furniture, wardrobes, library, display windows, internal carpentry (doors), steel joinery and steel shower cubicles. In addition, the project includes classic furniture, lighting and accessories from artists such as Isamu Noguchi, Carlo Hauner, Johannes Andersen, Kai Winding, Edmund Homa, Verner Panton, Aksel Bender Madsen, Overgaard & Dyrman and Patricia Urquiola. The interior is accessorised with paintings, graphics, sculptures and ceramics (Igor Mitoraj, Leon Tarasewicz, Aleksandra Mysiorska, Bartosz Kosowski, Michael White, Antoni Janusz Pastwa, Robert Maciejko, Malwina Konopacka ...).

### **About the studio:**

Studio Loft Kolasiński does both interior and industrial design. We give advice and share our knowledge when it comes to selecting furniture, accessories, finishing materials and construction work. We cooperate with specialists from rare and specialized industries.

For our interior design projects we often use furniture that we design ourselves, that are created in our befriended carpentry shop. These are individual, bespoke projects that we created especially for the needs and stylistic preferences of our customers. In 2015, we designed our first furniture collection called 'Public Project' We also do unique designs of carpets, that are created in Nepal.

We have a special appreciation for items made in the period between the 20's and the 70's.

Hence, in our projects we often use unusual, vintage furniture, lighting, ceramics, prints, rugs and carpets. We purchase them in auctions and from befriended collectors from all over Europe. When renovating furniture, we pay special attention to preserving their original character.

We have often made interior designs of unique properties such as adaptations of lofts, industrial buildings or old houses.
